PART I.

REVENUE

SECTION 1—LAND REVENUE

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 8490, dated the 26th January 1907, from the Revenue Commissioner in Mysore, forwarding letter No. 506, dated the 21st idem, from the Deputy Commissioner of the Bangalore District, requesting sanction to the restoration to the parties concerned for cultivation, of certain lands which had been acquired from them on payment of compensation for the extension of the waste-weir of the Hanabe tank in the Dodballapur Taluk, but which are not now required by the Public Works Department.

No. R. 8102-4—L. R. 447-06-2, DATED BANGALORE, 7TH MARCH 1907.

ORDER THEREON.—Six guntas of land out of Survey No. 197 in the Hanabe village and 4 guntas of land out of Survey No. 69 in the Maralenahalli village of the Dodballapur Taluk, were acquired in October 1893 on payment of a compensation of Rs. 5, for the purpose mentioned above. In Government Proceedings No. 19131-2—R. F. 25-93, dated the 5th May 1894, the proportionate assessment on the 10 guntas was sanctioned to be written off the accounts. In May 1904, the Amildar reported to the Sub-Divisional Officer that the lands had not been made use of for the purpose for which they were acquired, that they were lying waste, and that their assessment had not also been written off the accounts. In July 1904, the Deputy Commissioner, to whom the matter had been reported, informed the Sub-Divisional Officer that it was ascertained from the Executive Engineer that the lands were required by the Public Works Department, and that therefore the necessary alterations should be made in the Akarbands of the two villages. It was only in the beginning of the year 1906 that the Survey Department was requested to have the necessary alterations made in the Akarbands. Immediately after the alterations were effected, in April 1906, the Amildar reported to the Sub-Divisional Officer that it was ascertained from the Executive Engineer that the lands were not required and that they might be restored to the parties concerned on receiving back the compensation amount from them. Thereafter the Deputy Commissioner made a reference to the Survey Department with a view to have the Akarbands corrected again. The Superintendent of Revenue Survey replied that sanction of Government was necessary in the matter as the assessment was once written off the accounts under their orders. Hence the reference to Government by the Revenue Commissioner, requesting sanction to the lands being restored to the parties concerned for cultivation, who are reported to have returned the compensation amount.

2. Government observe that as the lands have been acquired for public purposes, they are the property of Government and as such the Deputy Commissioner has power to dispose of them under Section 36 of the Land Revenue Code, with the previous sanction of the Revenue Commissioner as required by Section 39. The matter did not therefore require to be referred to Government. As the assessment has been written off and the lands are situated in the Dodballapur Taluk into which Survey and Settlement have been introduced, the assessment will be re-imposed by the Survey Department after it has been decided to restore the lands for cultivation.

3. It is to be regretted that the Public Works Department required more than twelve years to decide that the lands were not required for the purpose for which they were acquired. It ought to have satisfied itself of the necessity for the acquisition of these lands before moving the Revenue Department for the purpose,

and if subsequent events rendered their retention unnecessary, this should have been intimated promptly to the Revenue authorities, so that the lands could have been given out for cultivation immediately, thereby avoiding unnecessary loss of assessment to Government and injury to land owners.

The following letters received from the Deputy Commissioners of districts, submitting the return of the estimated Jamabandi under the several heads of revenue, for the year 1906-07 :—

Letter No.	Date	From whom

623	9th do	Do Mysore do

No. R. 8796-804—L. R. 466-06-9, DATED BANGALORE, 26TH MARCH 1907.

ORDER THEREON.—The total estimated Jamabandi for the year 1906-07 under the several heads of revenue is, as specified in the subjoined statement, Rs. 1,81,50,047 against Rs. 1,81,54,975 showing thereby a slight decrease of Rs. 4,928 as compared with the actual demand for the year 1905-06. The estimates may well be regarded as over-cautious rather than over-sanguine.

2. *Land Revenue.*—The total estimated Jamabandi under this head shows a net increase of Rs. 35,612 in all the districts except Hassan and is reported to be due to the large increase in the number of darkhasts received during the year for fresh lands on account of timely rains. The falling off of Rs. 6,916 in the Hassan District is reported to be due to a decrease of Rs. 6,025 in malki sales and to the resumption of lands assessed at Rs. 891 for arrears of revenue. The reason of this decrease at variance with the general tendency of cultivation in other parts of the State has not been explained and Government trust that it is not due to any other cause than the ordinary fluctuation of cultivation.

3. *Forest.*—Under this head, there is a net decrease of Rs. 82,894 notwithstanding the estimated increase of Rs. 208, 4,400, 19,492, 15,519 and 426 respectively in the Bangalore, Kolar, Hassan, Kadur and Chitaldrug Districts. The Deputy Commissioners of the Hassan and Kadur Districts state that large increases in the demand are expected this year under "Sandalwood and Timber." The fall of Rs. 47,001 in the Tumkur District is stated to be due to the non-sale of Tangadi bark during the year. The Deputy Commissioner is requested to submit a report as to the circumstances under which the Tangadi bark was not sold. In the previous year's report it was stated that there was no amount to be credited under that head as the Tangadi bark had been sold for two years, in the year 1904-05. As this period should apparently have expired at the end of the year 1905-06, a fresh sale should have taken place for the current year, and it is hoped that there has not been any omission on the part of the local authorities to hold the sale. In the Mysore District the decrease of Rs. 68,076 is due to the difference in the budget estimates as given by the Forest Department for 1906-07 and the actual Jamabandi for the year 1905-06. The Deputy Commissioner does not assign any reason for the decrease in the figure, apparently considering that the responsibility therefor is with the Forest Department. In sending returns, figures are not merely intended to be mechanically reproduced, and if the Deputy Commissioner considered that the estimate of the Forest Department in the budget has been below the mark, he should have corrected it. Otherwise, as these returns are sent after some experience of the realizations for the year has been gained he should explain the difference.

4. *Abkari.*—The large increase of Rs. 1,07,224 under this head in all the districts is reported to be due to favourable bids for toddy and arrack this year.

No. R. 8277—L. R. 199-06-8, DATED BANGALORE, 12TH MARCH 1907.

ORDER THEREON.—The dates suggested by the Revenue Commissioner in the above statement for the submission of the returns and reviews mentioned therein are suitable and are approved by Government except in the case of the following three returns. 5. *Mohatarfa, Sayer and Salt.*—The decrease of Rs. 11,466 under the head "Sayer" especially in the Tumkur and Shimoga Districts, is reported to be due to poor out-turn of supari crops. Under Mohatarfa, there is a slight decrease of Rs. 2,911, while under "Salt" there is an increase of Rs. 3,270 for the whole State.

6. *Miscellaneous.*—The large decrease of Rs. 29,209 under this head in the Bangalore District is merely nominal, as it is stated to be due to the inclusion of the sale proceeds of the old Taluk Cutcherry building in the demand for the year 1905-06. The fall of Rs. 17,263 in the Hassan District is reported to be due to decrease in the sale proceeds of Amrut Mahal Cattle as also to a decrease in collection under "Stamps," "Medicine" and "Registration Fees."

7. The annexed statement gives the talukwar particulars with reasons for important fluctuations.

KADUR DISTRICT.

Statement showing the estimated talukwar jamabandi under the several heads of Revenue for the year 1906-07 as compared with the actual jamabandi of the preceding year 1905-06.

Taluk	Items	Estimated jamabandi for the year 1906-07	Actual jamabandi for the year 1905-06	Difference		Remarks
				Increase	Decrease	
Tarikere	Land Revenue	1,30,672	1,29,326	1,346	...	This increase is due to the number of applications already received for fresh lands for cultivation.
	Forest	33,472	33,795	...	323	It is expected that there may be a decrease of revenue under minor forest produce.
	Abkari	43,880	43,894	...	14	The small decrease calls for no explanation.
	Mohatarfa	4,550	4,537	13	...	Based on the actuals of previous year.
	Sayer	10,000	10,182	...	182	Fluctuating.
	Salt	125	125	...	..	
	Miscellaneous	8,722	7,751	971	...	The increase under this head is from acreage contribution.

Kopps	Land Revenue	1,83,515	1,83,995	...	480	Although there is an increase of about Rs. 580 on account of banjar lands taken up for cultivation, a net decrease of Rs. 480 is anticipated by the fall of revenue under sale of coffee land, garden produce and excess in collection when compared with the figures for 1905-06.
	Forest	3,645	3,435	210	...	The increase is expected under minor forest produce.
	Abkari	54,430	54,140	290	...	The increase is due to favorable bids.
	Mohatarfa	1,060	1,058	2	...	
	Sayer	54,018	53,682	336	...	The crops being in somewhat better condition, an increase expected under this head.

Kadur	Land Revenue . ..	1,67,011	1,64,660	2,414	...	The increase is due to land having been taken up for cultivation.
	Forest	6,038	6,061	..	23	The decrease is under minor forest produce.
	Abkari	44,420	41,007	3,413	...	Due to favorable bids for toddy shop.
	Mohatarfa	5,120	5,145		25	
	Sayer	7,[illegible]	7,945	..	121	The decrease is reported to be due to the poor crop.
	Salt	500	250	250	..	The increase is due to the number of dakhasts already received and the sum is reported to be favorable for the season.

SECTION 2—LAND SURVEY

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 2, dated the 25th February 1907, from Col. J. F. Grant, Survey and Settlement Commissioner in Mysore, submitting the annual Progress Report of the Mysore Revenue Survey Department for the year ending the 31st October 1906.

No. R. 8783-93 L. S. 54-06-2, DATED BANGALORE, 26TH MARCH 1907.

ORDER THEREON.—The work done during the year consisted chiefly of partial resurvey. It extended to 1,453 square miles as against 1,390 square miles in the year previous, and comprised the whole of the Tumkur, Maddagiri and the late Koratagere Taluks and the remaining portion of the Honnali Taluk as well as 66 villages of the late Gudibanda and 65 villages of the late Anantapur Taluks, as they stood at the original settlement.

2. The work of original measurement, which is at present necessary chiefly in Inam villages, was carried on over 909 survey fields measuring 5,401 acres in eight villages.

3. The new rates were announced in the Challakere Taluk and also in the late Budihal Taluk (now part of Chiknayakanhalli and Hosdurga Taluks).

4. There has been a perceptible increase in the quantity of work done during the year. This is partly accounted for by the somewhat easier nature of the country dealt with, which is chiefly maidan, and allowed greater economy in respect of the time required for travelling, but is also due to an increase in the number of chains per establishment carried out in accordance with the suggestion of Government made in the last year's review in regard to more work being done under the supervision of each officer. Government are glad to observe that the Survey Commissioner considers that, although it may not be desirable to increase the amount of work done by putting each officer in charge of more than one establishment as tending to lessen the efficiency of supervision, yet the same result may be achieved by increasing the number of men working in each establishment. What Government desire is that while the work done should be as thorough as possible, every endeavour should be made to utilize each establishment to its fullest working capacity and get the maximum amount of work compatible with efficiency turned out, and they accordingly note with pleasure that the Survey Commissioner has also had this end in view.

5. It is very regrettable that, in spite of repeated orders and instructions in the matter, the inspection and restoration of boundary marks still continue to absorb an undue percentage, *viz.*, 54·67, of the total working days of the Survey Department. In the area resurveyed, 15,869 bandhs and 93,970 stones were found missing as against 7,468 bandhs and 111,520 stones in the previous year. The Revenue Commissioner is requested to expedite the report in the matter, called for in para 2 of Government Order No. 2656-67—L. S. 53-05-3, dated the 30th August 1906, and also to report what effect the circular recently issued by him (No. 4167-74, dated 26th October 1906) with the approval of Government, has had in the tracing and restoration of boundary marks. As the experience of resurvey parties in all areas now surveyed has shown that bandhs have been grossly neglected, the Revenue Commissioner is requested to devote special attention to the matter and arrange for the restoration of all missing boundary marks throughout the State.

6. The total number of fields tested was 2,941 or 13·78 per cent of the original work, as against 1,850 fields or 11·59 of the original work in the previous year.

7. The loss of working days in the C and D establishments is not satisfactory. It is regretted that this is chiefly ascribed, especially in the case of C establishment,

to want of co-operation on the part of villagers or taluk authorities. Government wish in this connection to impress on all concerned the fact that Amildars and their subordinate Revenue officers are bound to give every assistance to survey officers and exercise their influence in bringing the villagers together so that survey work may be carried on with all expedition and after careful investigation.

8. The work in the classing establishment this year consisted chiefly of the re-classification of the water-supply to wet and garden lands in 220 villages. 13,370 fields have been dealt with, as against 12,340 fields in the previous year, and the culturable area has been 67,981 acres against 45,034 acres in the previous year. The M. establishment did also the original classification of 20 Inam villages scattered over 13 taluks and some miscellaneous work in the Heggaddevankote Taluk.

9. The cost of the Department during the year under review was Rs. 1,80,962-6-11 against Rs. 1,76,190-5-11 in the previous year, the increase being due to the rise in the cost of establishment, by the employment of more measurers, and also under contingent charges. There has been a corresponding increase of work.

10. Government trust that the map of the Mangala village, the preparation of which has been held in abeyance for more than two years, will be completed soon and issued.

11. Government are glad to note that all the officers of the Survey Department have done their work satisfactorily.

12. In view of the approaching retirement of Col. Grant from the service of the Durbar at the end of the current official year and of the fact that the report now under review is the last to be submitted by him, the Government take this opportunity to place on record their high sense of the valuable services rendered to the State by Col. Grant during his long connection with the Survey Department extending over 43 years, including the period of over 25 years during which he was at the head of the Department and directed its operations.

13. Col. J. P. Grant was in the Military Department from 1856 to 1860, during which time he served through the Mutiny, and obtained the Mutiny medal. From 1860 to 1863, he was Assistant Superintendent, S. M. Country Revenue Survey. He first joined the Mysore Revenue Survey in November 1863 as Assistant Superintendent rising to Deputy Superintendent in 1865 and to Superintendent in January 1883 and was made Survey and Settlement Commissioner on 12th August 1903. Since 1881 he has also had charge of the Inam Department in addition to Survey. His service from 1863 to 1890 was purely British. He retired from British service on the pension of his rank on the 1st January 1890, from which date up to now his service has been wholly under the Mysore Government. On 1st July 1907, on which date he is to retire, he will have put in 17½ years in the Mysore State after retirement from the British service. Col. Grant completed the original settlements of the State, and his services have also been retained for the revision settlements now under progress.

14. During this long period of service, Col. Grant has been responsible for the introduction of the original settlement into 65 out of the 68 Taluks of the State and the revision settlement into thirteen. His mastery of the system and principles of Revenue Survey and Settlement, and his long and intimate acquaintance with all parts of the State and the condition and needs of the people, and his sympathy with the raiyat population as well as the thoroughness which has invariably characterised his work, have enabled him to perform the difficult work of survey and settlement to the entire satisfaction of the Government and the people. While not sparing himself in the discharge of the regular duties of his office, he has responded cheerfully to the calls of Government for his advice whenever it was sought in the solution of difficult and complicated revenue questions. The Government also acknowledge the valuable aid rendered by him in passing the Mysore Land Revenue Code and the Rules thereunder.

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

1. Letter No 4678, dated 7th November 1906, from the Revenue Commissioner in Mysore inviting the attention of Government to an article that appeared in the *Daily Post* of the 5th November 1906, under the heading " Nitrate of lime as a fertilizer " and proposing that nitrate of lime which is available in large quantities around Marikanve may be manufactured as manure by means of electric power at the Marikanve Reservoir and made available for the whole State at a cost which will compare very favourably with that of the article imported by sea or carried by rail from a distance.

2 This office No. R 5142-4—Agri 101-06-2, dated 17th November 1906, requesting the Chief Engineer and the Agricultural Chemist in Mysore to investigate jointly the above proposal of the Revenue Commissioner and to submit their opinions in the matter

3. Letter No 629, dated 26th January 1907, from the Chief Engineer in Mysore, forwarding the accompanying report of the Agricultural Chemist in the matter and stating that it is not advisable under present conditions to start such an experimental industry —

Letter No. 668, dated 21st January 1907, from the Agricultural Chemist in Mysore, to the Chief Engineer in Mysore.

In reply to your letter No 339, dated the 16th January 1907, I have the honor to state that there are two methods by which it is hoped to " fix " atmospheric nitrogen by means of electric power cheaply enough to compete with naturally occurring nitrates. One of these gives nitrate of lime, the substance referred to in Government Proceedings No R. 5142-4—Agri. 101-06-2, dated 17th November 1906, the other Calcium Cyanamide. Of these the latter has been used for some years by a German firm in Berlin and the product manufactured by it has been experimented with very extensively but has found little or no use as yet in every-day farming practice The former method, that producing nitrate of lime, has not yet been tried on the large scale for any length of time A factory with three furnaces of 500 Kilowatts has been built at Notodden in the southern part of Norway in 1905. Experiments on a " moderately large scale " have been made by the French Society of Electrochemistry at Geneva, and other experiments were conducted by the Atmospheric Products Co. at Niagara Falls In Switzerland and Norway experiments have also been made and the famous Badishe Soda und Analine Fabrick is said to have made preparations for making nitric acid by electricity. From correspondence I have had with Major Lotbiniere I gather that the Government of Kashmir are considering the advisability of manufacturing nitrate of lime or have already decided to do so In Austria, too, works are to be built for manufacturing nitric acid electrically

But notwithstanding this activity in the manufacture of nitric acid out of the atmosphere, I have been unable to find any definite figures as to the expense involved based on actual practice. The only figures I have been able to find are based upon suppositions and place the Kilogram of combined nitrogen at 12 annas per pound, when producing nitrate of lime, and at 11 annas 6 pies, when manufacturing free acid But these figures have been criticised as being too low The Kilowatt-year has been assumed to cost 50 francs (about Rs. 30) but is calculated to produce only K 250 of nitric acid containing K 55 of fixed nitrogen The wages and incidental expenses have been put down at only Rs 6 per ton of nitric acid, containing K. 111 of fixed nitrogen Repairs at Rs 24 and interest and depreciation at Rs 33 (" 5% of capital " per ton, of nitric acid). According to this the capital required per Kilowatt would be Rs 330 But in later estimates by the same person the cost has been put down at Rs 180 to Rs 240 per Kilowatt. Some of these figures are, I fear, too low for India. They were computed in France

The energy required to produce 100 Kilogrammes of combined nitrogen varies considerably according to the different methods employed These differences range from ½ Kilowatt-year to 1¼ Kilowatt-year, or in other words, 1 Kilowatt-year has produced from 200 Kilos. of fixed nitrogen to 88 Kilos The patent of the Badishe Soda und Analine Fabrick mentions 143 Kilos Two hundred Kilos is admittedly something very exceptional. In the calculations already given of the cost of producing nitric acid electrically the outturn per Kilowatt-year has been put down as only 55 Kilos. of combined nitrogen.

The present market value of a Kilo. of combined nitrogen for manurial purposes is practically one rupee.

As stated before, I know of no experiments in which nitrate of lime has been tried as a manure. But there can be no doubt that it will turn out very satisfactorily, in fact, it is quite possible that it may in one respect be even a little superior, in exceptional cases, to nitrate of soda, which is at present the standard nitrogen fertilizer

Calcium Cyanamide is a fertilizer, which, if certain precautions are observed, is about equal to Ammonia salts (in which the nitrogen has practically the same value as in nitrate

of soda). This precaution is that the fertilizer must be applied nearly two weeks before the crop which it is intended to supply with nitrogen is sown. Unless this precaution is taken, the fertilizer acts as a poison killing the young plants when they have germinated. But notwithstanding this, it may be wise to also consider the manufacture of this fertilizer. For the first step in its manufacture produces calcium carbide which on being further heated in an electric furnace in an atmosphere of nitrogen gives calcium cyanamide. This process requires, I expect, more machinery to carry it through than is required for making nitrate of lime. But to fix a Kilo. of nitrogen by means of it costs about the same and it has the advantage of the calcium carbide being a marketable product; and, with the great fluctuations in the demand for fertilizers in India, it may be wise not to have the working of the factory depend entirely on the demand for fertilizers.

The principal consumers of commercial fertilizers in India are the European planters. There are indications that the raiyats will in the near future use much more commercial fertilizers than they now do. But I doubt if when planning a factory it would be safe to take this into consideration. To my mind it is extremely doubtful if the manufacture of nitrate of lime as a fertilizer could be made a commercial success at the present time if the market is to be confined to India.

But if the project is to be undertaken with a view of stimulating the use of commercial fertilizers by the raiyats and thus promoting the agriculture of the country, it may prove a very successful enterprise. No doubt the soils of Mysore are very deficient in nitrogen and the very novelty of the manufacture would create a curiosity in regard to the fertilizer which would help in the raiyats' trying it; and once having tried it, they would probably continue to do so; so that in the end the undertaking might also prove a commercial success. But in that case nitrate of lime is the only substance deserving consideration.

As considerable uncertainty exists about both the market and the details of manufacture of nitrate of lime, it is in my opinion not an industry which can, at the present time, be recommended as one giving certain returns, nor are the possibilities of making a handsome profit sufficiently large to recommend it in my opinion as a speculation, especially when there are other manufacturing enterprises which appear both safe and profitable which might be undertaken.

A table giving some results obtained in experiments with making " Electric " nitric acid is here given :—

Date	Name of experimentor	Nitric acid per kilowatt-have	Nitrogen " fixed "
		Gr.	Gr.
1897	Rayleigh	49·1	9
1900	McDougal and Howles	33·8	7·5
1902	Kowalsstri	55·0	12·2
1903	Mulhmann and Hoffer	70·0	15·5
1897	Crooks	74·0	16·4
1902	Bradley and Loocjoy	83·0	18·4
1904	Brickland and Eyde	110·0	24·4

The Notodden factory works on the Brikeland Eyde process produces K. 111 to K. 132 of fixed nitrogen per Kilowatt-year and turns out up to 330 K. of fixed nitrogen per day. The Company is building much larger works, which will utilize up to 30,000 horse-power. To generate a horse-power is estimated to cost Rs. 9 per year.

A review of the investigations on the whole subject, particularly those relating to the advances made in Norway are given in *Engineering* (London) 1906, pp. 89 and 90. You may have this Journal. Also in *Electrician* 1905, of December 30th, supplemental page 417; *Journal of Agriculture*, Part, New Series (ii), pp. 296-299 and 328-330, also pp. 265-268.

I have a number of other references I could give you to journals to which I have unfortunately no access. But probably you have not got them either.

ORDER THEREON.—The Revenue Commissioner states that the Agricultural implements referred to are of very great practical utility and a demonstration of their use to the raiyats will be very advantageous, as it would induce some of them to introduce similar implements into their estates. He also proposes to hand them over finally to some of the more important District Boards for purposes of demonstration after exhibition for some time by Revenue officers.

Under the circumstances, Government are pleased to accord sanction to the purchase of the implements, and direct that the charge be met from Local Funds General.

The Revenue Commissioner is requested to see that the use of the implements is as widely demonstrated as possible and serves as an object lesson.

1. *Subject No. 337* of the Representative Assembly of 1906 and the reply of Government thereto :—

Exhibition of local industrial articles during Dasara in the Mysore City.

Mr. Amble Annaiya Pandit, Yedatore Taluk.

Summary of discussion.—If silk goods, kamblies, vessels and fancy goods manufactured in the Mysore State be exposed for sale every year during Dasara in the upper storey of the Lansdowne Bazaars, they will find a ready sale. As this will greatly encourage local industries, it is prayed that proper arrangements be made in this behalf.

Reply of Government.—A good suggestion. Government will make the necessary arrangements to make such exhibitions a fixture in connection with the Dasara. The members should also co-operate and encourage their constituents to send in exhibits.

2. Letter No. 8263, dated the 28th January 1907, from the Revenue Commissioner in Mysore on the subject, in reply to this office docket No. 6368—Agri. 117-06-1, dated the 23rd December 1906 :—

"With reference to your docket No. 6368—Agri. 117-06-1, dated 23rd December 1906, requesting me to formulate a scheme in consultation with the Deputy Commissioners of Districts for holding an exhibition of local industrial articles during the Dasara in the Mysore City, I have the honour to state as follows :—

2. I think it will be very useful to hold every year during the Dasara an exhibition of local products both agricultural and industrial and also to make provision for the exhibition of agricultural and industrial machinery and implements. The object of the exhibition should be not merely the promotion of the sale of articles (as suggested by Mr. Amble Annaiya Pundit in the Representative Assembly) which should be left solely to private trade, but the collection of such exhibits as the study of which would contribute to improve our arts and industries and agricultural methods by making available to people interested therein samples or models for adoption and the necessary information regarding the place and mode

of manufacture, the cost thereof, the place where the raw produce, the manufactured article or skilled labour is found, and such other essential details. Similarly, implements and machinery useful for agriculture or manufacture may be exhibited and short lectures in English and Kanarese explaining the method of using the machinery and implements, and their cost, construction and repair, may be arranged, thus combining in a manner a movement which will be the nucleus of both a Conference and Exhibition of an educative value and solely confined to agriculture and useful industries.

3. For this purpose a Standing Committee composed of the officers noted in the margin may be appointed by Government, and during the Dasara such of the Deputy Commissioners of other Districts as happen to be present at Mysore will be *ex-officio* members of this Standing Committee. The Assistant of my office in charge of the Statistical Department may be appointed Secretary to the Committee to be in charge of all the correspondence connected with this annual Dasara Industrial and Agricultural Exhibition and Conference as it may be styled.

1. The Chief Engineer.
2. The Revenue Commissioner.
3. The Agricultural Chemist.
4. The Conservator of Forests.
5. Mr. Cameron.
6. Mr. Subbaswami Iyer.
7. Mr. V. Rangaswami Iyengar, Executive Engineer, Hessarghatta Water Works.
8. The Deputy Commissioner, Mysore.
9. The Deputy Commissioner, Bangalore.

4. The co-operation of European and Indian commercial and manufacturing firms who deal largely in machinery and implements may be invited, and such of them as exhibit the machinery and implements may be given free of charge the space necessary for exhibiting them, and also, if indispensable, a subvention to meet the charges incurred in transporting the machinery and implements to and fro—such subvention to be approved by the Committee prior to the Exhibition.

5. The other articles or samples exhibited will be collected mainly through the members of the Committee on such conditions as to sale, return or payment of price as may be thought advisable by the Committee. Therefore articles merely intended for sale or which do not fall under the category of samples illustrative of agricultural or industrial improvement will be shut out from the Exhibition, which can be then brought under effective control. In this way merchandise intended only to promote sale or to attract mere sight-seers in search of amusement will be excluded and there will be greater time and opportunity for proper inspection of exhibits by persons having a real interest in agricultural and industrial pursuits and for giving suitable instruction regarding the exhibits and working of the machinery.

6. Suitable specimens found in the Bangalore Museum and similar institutions may also with advantage be transferred to Mysore for the occasion.

7. The above proposals are made tentatively and may be improved upon when we have had more experience.

8. I have sent a copy of this letter to officers 1, 3, 4 and 5 mentioned in para 3 *supra*, and to all the Deputy Commissioners of Districts for their opinion, and shall address Government again on the subject on receipt of their reply. In the meantime, if the above general outlines commend themselves to Government, the Government may appoint at once the Committee proposed in para 3 and ask it to formulate a complete scheme including the grant which may be necessary for holding the Exhibition of 1907 for the final orders of Government."

No. R. 8152-67—Agri. 117-06-3, dated Bangalore, 8th March 1907.

Order thereon.—As a measure calculated to promote the improvement of the arts and industries of the State, Government have resolved to take advantage of the large concourse of people attracted to Mysore during the Dasara festivities, to hold annually in connection therewith an Exhibition of products of the State, both agricultural and industrial, as well as the machinery and implements connected therewith. Arrangements will also be made, as far as possible, for collecting other exhibits, a study of which may be likely to act as an incentive to improvements in local products, or methods of production, and for lectures being delivered by competent persons in English and Kanarese, explaining the use of machinery and implements, their cost, construction and repair. Further, a cattle, sheep and horse show will be held at the same time, as a desirable adjunct to the Exhibition.

2. Government are desirous that very early effect should be given to this scheme, and the first Exhibition held during the ensuing Dasara. For this purpose Government are pleased to appoint, tentatively, a Committee composed of the marginally noted officers as members, with the Revenue Commissioner as President, to be called "The Dasara Industrial and Agricultural Exhibition Committee." One of the Assistants to the Revenue Commissioner will be deputed by him to perform, in addition to his present duties, those of Secretary to the Committee, and to look after the correspondence connected with the Exhibition.

1. The Revenue Commissioner, *President.*
Members.
2. The Chief Engineer
3. The Agricultural Chemist.
4. The Conservator of Forests.
5. The Superintendent, Government Gardens.
6. Mr. Subbaswami Iyer, Superintendent, Industrial School, Mysore.
7. Mr. V. Rangaswami Iyengar, Executive Engineer, Water-Supply Division
8. The Deputy Commissioner, Mysore.
9. The Deputy Commissioner, Bangalore.

3. The Committee are requested to formulate a complete scheme of the Exhibition, not only in connection with the ensuing Dasara, but also for one permanently to be held annually during each Dasara. They should submit proposals to Government regarding the collection, staging, etc., of exhibits, including the arrangements for holding the cattle show, and the modes in which the expenditure relating to the Exhibition may be met, and draw up rules for the guidance of the Committee and the exhibitors in general.

4. An estimate of the amount that may be required for the next Exhibition should be submitted at an early date with a view to the necessary provision being made therefor.

Letter No. 8171, dated the 30th January 1907, from the Revenue Commissioner in Mysore, requesting sanction to the annual grant of a sum of about Rs. 500 for the purchase of seed grains and agricultural implements of small value, to enable him to utilize the same for the improvement of agriculture, the bettering of the condition of weavers, the use of improved implements and machinery and distribution of seed grains, and Rs. 250, for the current year, to meet some expenditure to be incurred in buying seeds and implements, etc., to be appropriated from the general savings

---

No. R. 8883-4—AGRI. 119-06-6, DATED BANGALORE, 28TH MARCH 1907.

ORDER THEREON.—Government are pleased to accord sanction to the annual grant of Rs. 500 asked for for the purpose specified above. The Revenue Commissioner is requested to make a provision in the budget estimates for the purpose in future. A report should be submitted to Government at the end of the year, as to the manner in which the funds have been utilized and the extent to which local industries have benefited thereby.

2. For the current year, the sum of Rs. 250 required by him being small, he may suggest a reappropriation from the sanctioned grants under his control.

SECTION 4—FOREST

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 282, dated the 15th October 1906, from the Deputy Commissioner of the Mysore District, submitting for orders certain records relating to the settlement of Bheemanbidu sandal block in the Gundlupet Taluk.

No. R. 7881-91—FT. 100-06-2, DATED BANGALORE, 1ST MARCH 1907.

ORDER THEREON.—The raiyats of the villages adjoining the Bheemanbidu sandal reserve appealed to the Deputy Commissioner, Mr. Sparkes, against the decision of the Forest Settlement Officer on certain points. Mr. Sparkes decided in their favour, but on a representation from the District Forest Officer he reserved the case for further enquiry. Mr. Sparkes having left the Mysore District, the present Deputy Commissioner, Mr. Kantaraj Urs, solicits orders of Government as the District Forest Officer's representation contemplates a revision of the decision of his predecessor in office.

2. Mr. Sparkes' order cancelling the entire settlement is quite unauthorised. His decision in appeal should have been confined to the claims advanced by the raiyats which concerned the deficiency of pasturage lands, and even so the decision should have been passed after hearing the District Forest Officer. As it is, he has received a revision petition from the District Forest Officer against his aforesaid order and held that a fresh enquiry by the Deputy Commissioner is necessary, which itself shows that his previous order was not well-founded. Mr. Sparkes' order is therefore cancelled.

3. Upon the merits of the case it is clear that the tract proposed to be reserved is a valuable sandal tract, the most valuable in the Gundlupet Taluk, it is stated, and can be reserved with abundance of grazing ground still left for the requirements of the local cattle. The Forest Settlement Officer, the late Mr. A. Ananda Rao, seems to have gone into the case fully and made all due concessions for the convenience of the villagers. And Government see no good reason to meddle with it. The Forest Settlement Officer will accordingly submit without delay the settlement records and the final draft Notification under Section 17 of the Forest Regulation in respect of the forest block in question.

1. Government Order No. R. 3490-5000—Ft. F. 45-05-7, dated the 28th September 1906, sanctioning the introduction into all the districts tentatively, of the scheme for the issue of licenses for the collection and sale of forest produce through middle-men.

2. Letter No. 2853, dated the 24th October 1906, from the Conservator of Forests in Mysore, suggesting certain modifications to the rules relating to the issue of licenses referred to in the above.

No. R. 7909-19—Ft. 73-06-3, DATED BANGALORE, 2ND MARCH 1907.

ORDER THEREON.—The attention of the Conservator of Forests having been invited to the desirability of modifying in certain respects the rules originally sanctioned in Government Order No. 330—1752-61, dated the 8th November 1901; he has now submitted his opinion which is to the following effect:—

2. Referring to Rule 4, the Conservator states that license forms are now issued from his office on indents received from the District Forest Officers and not from the Stationery Depot direct as provided for in the said rule and that the rule may therefore be altered in conformity with the present practice. This will be done accordingly.

3. The Conservator states that the number of license vendors in each Range is strictly regulated according to requirements and that this matter may be safely left to the discretion of the District Forest Officer and that as a rule not more than three or four vendors would be required in each Range. Government consider that it is necessary that the number should be specified in the rule itself instead of leaving it to the discretion of the District Forest Officer and giving even occasional scope for the exercise of unwholesome competition.

4. The Conservator also states that as each vendor has to account for every license form issued to him and no two license vendors will have license forms bearing the same book number, a forged or a stolen license form can be immediately traced wherever it may have been issued. If checking is done systematically and with proper care, Government agree with the Conservator that the scope for fraud can be greatly reduced without the imposition of any more elaborate safeguards.

5. To Rule 16 the Conservator suggests the following additions, *viz.*:—

"The District Forest Officers will check Registers E and F of license vendors and their license books at least once a year and note the result in their weekly diaries. They will also check Registers B and C maintained at Range Offices, and license forms, counterfoils and recovered duplicates of licenses and record the result in their half-yearly Range Office inspection reports."

As there will not be more than three or four vendors in each Range, it seems very essential that the District Forest Officers should inspect the registers and accounts once in every six months.

6. It is proposed to add to Rule 19 the following sentence, *viz.*:—

"Such extension of period should be immediately intimated to the license-issuing officer for note in the original license."

7. With the modifications and additions detailed above, the rules will be re-issued as appended to this Order.

8. The Superintendent, Government Press, is requested to print 600 copies of these rules separately and forward the same to the Conservator of Forests for distribution. The Conservator is requested to cause the rules to be translated into Kanarese for the information of such vendors as are ignorant of English.

RULES FOR THE GRANT OF LICENSES FOR TIMBER AND OTHER PRODUCE.

For all timber and other forest produce sold otherwise than from forest or sale depots, a prepaid license must be obtained from persons authorized to grant it before any of the aforesaid produce can be cut, collected or removed by the purchaser.

2. License forms will be in books containing 50 forms in each in triplicate and shall be supplied only by the District Forest Officer. The forms should bear two printed numbers,—one book number and the other serial license number as in Forest cheque books. The former shall run on continuously for each kind of license not changing with the year, and the latter serially from 1 to 50. Such licenses should also bear the stamp of the District Forest Office.

3. Licenses will be of seven kinds as detailed below :—

1. For timber of reserved kinds	...	Printed on white paper.	
2. For timber of unreserved kinds	...	Do	yellow do
3. For firewood and charcoal	...	Do	red do
4. For bamboos	..	Do	blue do
5. For grazing	...	Do	green do
6. For minor forest produce	...	Do	brown do
7. For general	...	Do	rose do

4. All license books will be supplied from the Stationery Office, Bangalore, to the Conservator of Forests in Mysore, who will keep a stock of them and supply as many as may be required on indent to each District Forest Officer, who will submit an abstract statement of receipts, issues and balances in hand in Form A.

5. The District Forest Officer will supply the license books to issuing officers either direct or through the Range officers on indent which should be accompanied by a statement in Form A.

6. An account shall be kept by the District Forest Officer and Range officers of all license books received and issued in Form B and of a ledger account in Form C. License books of all descriptions must be kept securely under lock and key, and the District Forest Officer and Range officers will invariably check and compare the numbers with the periodical statements on inspecting offices.

I would retain the Taluk Amildar in this category. He has been authorized by the subsidiary rules of 21st September 1889 to issue licenses for felling and removing bamboos, etc., from District Forests and it seems undesirable to divest him of this power. H. R.

7. *License-issuing officers.*—There will be four classes of license-issuing officers, *viz.* :—

1. Specially authorized Forest officers.
2. Specially authorized village officers.
3. Salaried license vendors.
4. Commissioned license vendors.

There shall not be more than three or four vendors in each Range including Forest and village officers.

To ensure the success of the new scheme I would be more liberal in fixing the commission It may well be allowed at double the rate recommended by the District Forest Officer. Kamishdars are given their commission at this rate H. R.

Village officers and commissioned vendors will receive commission ranging between a minimum of Rs. 6-4-0 and a maximum of Rs. 12-8-0 per cent on the monthly amounts collected. The limits within which Forest officers are authorized to receive and retain moneys, prescribed in Government Proceedings No. 2907-16—Ft. F. 16-96, dated 5th October 1899, should not be exceeded.

Security is not necessary in the case of village officers whose solvency and respectability are vouched for by Amildars, but in the case of others as well as of the last two classes, cash security in the shape of Savings Bank deposit for Rs. 150 or personal security for Rs. 300 should be taken. They should further execute an agreement for good behaviour in Form D.

8. License-issuing officers shall remit to the nearest Taluk Treasury the amount of their collections accompanied by a letter of advice as often as possible, but not less than once a month. License-issuing officers of the last two classes shall not retain in their hands revenue in excess of their securities.

In the case of patels who are appointed license vendors, the help of Forest subordinates may be given in carrying the remittances to the Treasury whenever necessary. H R

9. The commission earned by vendors of the second and fourth classes will be paid to them by the Range officers on receipt of their monthly accounts supported by Treasury receipts.

10. *License-recovering officers.*—Duplicates of licenses issued shall be recovered by—

1. Forest officers. 2. Specially appointed recovering officers. 3. Village officers.

Licenses should be checked and the produce covered by them compared, as far as possible, before the produce leaves the limits of the forest. Patels of villages should check every license taken out in their villages and recover the duplicates. All duplicates recovered by recovering officers shall be sent to the Range officer once a month.

But when the patel is himself the license vendor, an independent recovering officer will of course be necessary. H R

11. *How to write up license forms.*—Issuing officers will receive from applicants the prescribed fee on the produce applied for and write up all the three parts of the license form in accordance with instructions as regards locality, quantity, route, etc., which will be issued from time to time by the District Forest Officer. They shall sign and date each part, hand over the original and duplicate to the purchaser and keep the triplicate attached to the book as a counterfoil for record in his office.

12. *Duties of license issuing officers.*—Licenses should be issued at all hours of the day and no purchaser should be detained longer than it is necessary to receive his fees and write up the license. License vendors will remit all the collections into the Taluk Treasury with as little delay as possible. They will be solely responsible for the safe custody and transmission of revenue. They should maintain a register of receipts and issues of licenses in Form E and a daily abstract in Form F. A monthly abstract of the latter should be submitted to the Range officer in the same form supported by Treasury receipts. License books, accounts and cash will be open to the inspection of all Revenue, Forest and Police officers.

This will not be practicable in the case of the village officer whose Revenue and Police duties not infrequently require his attendance at the taluk head quarters or elsewhere. To meet this difficulty, I would propose that he may be authorized to perform his duties as license vendor by proxy, during periods of his unavoidable absence from the village. H R

Counterfoils of used-up license books should be returned to the Range officer.

13. *Duties of Range officers.*—The Range officers will maintain the following registers:—

1. Register of receipts and issues of license books in Form B.

2. Ledger showing license books issued and returned by issuing officers in Form C

3. Register showing abstract of monthly statements of permits issued and revenue realized in support of the entries in their cash accounts in Form F. This register will be compiled from the corresponding monthly returns received from the issuing officers. They shall take care to compare the figures with those entered in recovered duplicates. A copy of this register will be submitted to the District Forest Officer with the monthly accounts.

14. All revenue obtained by sale of licenses and credited into the Treasury should be exhibited with full particulars in the debtor and creditor sides of the cash book.

15. On receipt of the license-issuing officer's accounts, they should check them carefully, and, if found correct, disburse to vendors entitled to them the commissions they have earned. License books and accounts of license-issuing officers should be checked once a month by the Range Officers or Foresters.

16. The counterfoils of license books returned by issuing officers will be checked carefully with the monthly returns submitted by issuing officers, and any differences noticed shall immediately be brought to the notice of the District Forest Officer. Recovered duplicates of licenses will be compared with their corresponding counterfoils and pasted on to them, reporting to the District Forest Officer any differences noticed between them. Counterfoils of used-up license books together with the recovered parts shall be sent to the District Forest Officer for custody. District Forest Officers will check Registers E and F of license vendors and their license books at least twice a year and note the result in their weekly diaries. They will also check Registers B and C maintained at Range Offices and license forms, counterfoils and recovered duplicates of licenses and record the result in their half-yearly Range Office inspection report.

17. *Duties of recovering officers.*—As soon as produce has been checked with the license and found to be correct, the original and duplicate parts of the license shall be endorsed under the signature of the recovering officer with the words "checked and passed," and the endorsement shall be dated and the original license will be handed over to the person producing it and the duplicate retained for transmission to the Range Officer. Should the produce not agree in quantity or kind with that specified in the license, it will be retained and a report to that effect submitted to the nearest Magistrate or Forest or Police Officer.

Patels of villages will be held responsible for checking licenses and comparing the produce covered by them when such produce is removed into their villages and for the punctual transmission of recovered licenses to the Range Officer.

18. *Conditions under which the license is granted.*—The following conditions will be printed on the back of the original license for the guidance of the licensee:—

(*a*) The license is not transferable and must be shown on demand to any Forest Officer, any Revenue Officer or to any Police Officer.

(*b*) The licensee shall produce this for check with the produce before the Forest Officer from whose jurisdiction the produce has been removed or to any recovering officer specially appointed for the purpose or to the patel of the village into which the produce is removed.

(*c*) The licensee shall observe all the conditions stated in this license as to quantity and kind of produce and as to the locality where it should be collected and the road by which it should be removed.

(*d*) Any breach of the above conditions will render the holder liable to immediate cancelment of this license and to the punishment provided by law.

19. *General.*—If, before the expiry of the period mentioned in the license, the produce has not been cut, collected or removed in pursuance of the license, the license shall be deemed to be cancelled, but the licensee shall be entitled to an extension of the period upon his proving to the satisfaction of the Range Officer that the non-removal was owing to unavoidable causes, such as heavy rains, floods or any accident while in transit on his paying a renewal fee equivalent to one-fourth of the fee already paid. Such extension of period should be immediately intimated to the license-issuing officer for note in the original license.

1 Government Proceedings No. 1009-13—Ft. 1-04-6, dated 24th July 1905, passing orders regarding the transfer of the Hagare and Kallabore kavals in the Hassan District to the Amrut Mahal Department and calling for a report as to whether the raiyats of Karihalli in the Alur Sub-Taluk are in earnest about founding a village in the Seegegudda Amrut Mahal Kaval if lands are granted to them for the purpose.

2. Letter No. 7301, dated the 4th January 1907 from the Revenue Commissioner in Mysore, submitting a report on the subject furnished by the Deputy Commissioner of the Hassan District.

No. R. 7950-4—Ft. 148-06-2, DATED BANGALORE, 4TH MARCH 1907.

ORDER THEREON.—The Deputy Commissioner states that the raiyats of Karihalli have applied for five acres of land and a building site to be given to each of them free of payment, and that they are willing to bind themselves to build houses within four months on the sites allotted to them and live there permanently and to forfeit their houses to Government in case of their failure to do so. He further states that he has inspected the locality in company with the Amrut Mahal Superintendent and has selected the blocks which may be granted to them.

2. The tract in question is situated near the 8th mile on the Hassan-Belur road and comprises three blocks. Block No. I measuring 170 acres, in which it is proposed to locate the houses of those who have come forward to found the new village lies to the south-west of the road. The situation of the site makes it a very suitable place for the village site and it is proposed to reserve it for that purpose. Block No. II lies to the north-east of the road bordering the Kadadaravalli village limits and comprises about 312 acres, and block No. III comprising 118 acres, is to the north of the same road bordering the village limits of Chikkagadavalli. They are separated by a hillock which is excluded as it is not fit for cultivation. It is proposed to assign lands out of blocks II and III for cultivation as they are adapted therefor. The Deputy Commissioner recommends the grant of these lands on the same conditions as those laid down in Government Order No. 3896-9—L. R. 115-06, dated the 10th October 1906, in respect of Madalgere Amrut Mahal Kaval in the Channarayapatna Taluk.

3. Government are pleased to sanction the free grant of two acres to each raiyat for cultivation and a site for building a house thereon subject to the following conditions, which should be embodied in a mutchalika to be taken from them:—

(*a*) That the applicant settles in the new village with the necessary farm stock, etc., of his own within six months from the date of granting the saguvali chit.

(*b*) That he undertakes to build his own house on sanitary principles, materials locally available being granted to him free of cost.

(*c*) That he brings the plot of land given to him under cultivation in the first cultivation season.

4. The Deputy Commissioner is requested to submit to the Revenue Commissioner periodical reports as to the extent of the lands granted and the progress made by the raiyats in bringing the lands under cultivation and in building and occupying the houses.

Letter No. 4856, dated the 3rd January 1907, from the Conservator of Forests in Mysore, submitting the papers relating to the proposed reservation of the Balur block in the Mudgere Taluk.

No. R. 8007-9—Ft. 138-06-2, DATED BANGALORE, 5TH MARCH 1907.

ORDER THEREON.—The Revenue Commissioner, while admitting the necessity for the reservation of a great part of the tract comprised in the proposed block, considers that further enquiries should be instituted before it can be notified for settlement, as no endeavour has been made to note the area under occupation of the different

kinds and the privileges enjoyed by the people and their requirements. The Conservator is of opinion that the area to be excluded and the objections raised by the neighbouring raiyats may be left to the Forest Settlement Officer for enquiry and disposal at the time of the settlement of the block. As the tract is thinly populated and comprises natural jungle, the block will be notified under Section 4 of the Forest Regulation and the Forest Settlement Officer will during the settlement make due provision for the needs of the locality.

2. Government, however, desire that all local officers in selecting areas for reservation should not fail to collect as much information as possible regarding the nature and condition of the locality, the extent of culturable land and land under cultivation, the extent of population, their immemorial rights and privileges in the tract selected, the live stock, and the extent of grazing lands set apart, so that Government may be in a position to consider the expediency of the proposed reservation from all points of view.

3. In this and in future similar cases, tracing from the topo-sheet showing the area to be reserved, should be sent for ready identification of the block on the map.

Read the following papers relating to the settlement of the Adarangi Forest in the Magadi Taluk of the Bangalore District :—

(1) "Letter No. 35, dated the 30th June 1905, from the Forest Settlement Officer in Mysore :—

"I have the honor to submit herewith a report on the conclusion of the settlement of the Adarangi Forest in the Magadi Taluk of the Bangalore District.

2 The initial notification under Section 4 of the Mysore Forest Regulation appeared on page 567 (Part I, English) of the *Mysore Gazette*, dated 4th August 1904, and the proclamation thereof under Section 5 of the said Regulation on pages 470, 471 and 472 (Part II, Kanarese) of the said Gazette, dated 11th August 1904.

3. The period fixed under Section 5 expired on the 10th November 1904. I inspected and perambulated the locality in March last (6th, 7th and 8th) and enquired into the claims presented by the raiyats, before me. The nature of the claims preferred, was as follows :—

(i) 4 claims for right of free grazing,
(ii) 2 claims for patta right,
(iii) 3 claims for right to remove minor forest produce,
(iv) 1 claim for right to worship,
(v) 1 claim for camping ground and
(vi) 7 claims for rights of way.

The claims mentioned in (i) and (ii) were rejected and those noted in (iii), (iv) (v) and (vi) were admitted and recorded.

The appeal period expired on the 7th June 1905. Intimation from the Deputy Commissioner as regards the non-preference of the appeals against my decisions, was received on the 30th June with his No. 3398, dated 29th June 1905.

5. The following are herewith submitted.
(1) B. Register of claims,
(2) C. Register of lands taken up,
(3) Boundary notification and
(4) Sketch map.

6. The date from which reservation has to take effect, has to be noted in the Boundary Notification."

(2) Letter No. 1291, dated the 9th August 1905, from the Conservator of Forests making certain suggestions in regard to grazing, wood for agricultural and other purposes and fuel for home consumption.

(3) Letter No. 2280, dated the 29th August 1906, from the Revenue Commissioner in Mysore, submitting his opinion on the settlement.

No. R. 8089-93—Ft. 17-05-15, dated Bangalore, 7th March 1907.

Order thereon.—The Revenue Commissioner suggests that Survey No. 46 of Mailanhalli village, which has been included in the Forest, may be left for the use of the villagers. The Deputy Commissioner of Bangalore and the Forest, Settlement Officer consider that its exclusion is not necessary and assign different reasons in support of their views. The survey number in question is kharab and not gomal and it does not therefore seem necessary to exclude it from the proposed reservation. The allotment of gomal land under the conditions of the tract is not insufficient. The villagers may obtain any additional grazing they may require by paying grazing fees. The settlement as finally revised by the Settlement Officer is, under the circumstances, approved and the appended draft notification will be published in the Gazette, the 1st May 1907 being entered as the date from which the Adarangi block will be declared a State Forest. The necessary additions have also been made in the notification as regards the locality in which the concession of grazing, etc., has to be availed of.

2. The Deputy Commissioner of the Bangalore District is requested to promulgate the boundaries of the Forest in the locality in which it is situated.

3. The assessment aggregating Rs. 55-8-0 on the undermentioned lands will be written off the accounts:—

(1) Letter No. 385, dated the 27th March 1905, from the Forest Settlement Officer in Mysore, containing his report on the settlement of the Lakvalli Forest Extension called Hosahalli Block in the Yedahalli Sub-Taluk:—

"I have the honor to report the conclusion of the settlement of the Lakvalli Extension (Hosahalli Block) in the Yedahalli Sub-Taluk of the Kadur District, as conducted by Mr. B. Ramaswami Iyer.

2. The initial notification under Section 4 of the Forest Regulation proposing this tract to be constituted into a State Forest was published with Government Proceedings No. 642-6428, dated 23rd April 1903, and the proclamation thereof under Section 5 of the said Regulation was also issued by Mr. Ramaswami Iyer on the 4th July 1903.

It cannot be made out from the records available, when he perambulated and inspected the Forest, but in his diary for the week ending Saturday the 29th August 1903, he mentions "that he perused the village maps containing lands proposed to be added to the Lakvalli State Forest on its western side and that in the absence of the settlement records and map of the Lakvalli State Forest on which the boundary Notification of 1895 was published, he could not be able to conduct any settlement." Subsequently he enquired into the claims of the villagers.

The claims preferred were as follows:—

(1) 3 claims for right of free grazing.

(2) 2 claims for right of way.

All the 3 claims in No. (1) were disposed of by excluding such portions of land as were prayed for.

The 2 claims for rights of way have been admitted and recorded.

The settlement decisions admitting the above claims were recorded by Mr. Ramaswami Iyer on the 15th July 1904 and copies thereof transmitted to the Deputy Amildar with this office No. 10, dated 24th July 1904, requesting him to announce to the parties and communicate to this office the date of such announcement. The Deputy Amildar in his No. 236 says that he read out the orders to the villagers concerned on the 15th day of November 1904. The appeal period expired therefore on the 15th ultimo.

No appeal seems to have been made to the Deputy Commissioner against the decisions of my predecessor.

The following records are herewith submitted:—

(1) Signed copy of B Register.

(2) Signed copy of C Register.

(3) Boundary Statement and

(4) Trace map

The date from which the reservation has to take effect has to be inserted in the final notification."

(2) Letter No. 9704, dated the 16th June 1906, from the Conservator of Forests forwarding the settlement papers with copies of correspondence between himself and the Revenue Commissioner on certain recommendations of the Deputy Commissioner of the Kadur District.

(3) Letter No. 146, dated the 18th December 1906, from the Forest Settlement Officer resubmitting settlement papers with necessary alterations as suggested in respect of a foot path to the Ranganathaswami temple in the Forest.

No. R. 8095-3—Ft. 211-05-8, dated Bangalore, 7th March 1907.

Order thereon.—In Government Notification No. 642—6482, dated the 23rd April 1903, the block in question was notified for enquiry and settlement. The settlement was completed and announced on the 15th November 1904 to the villagers of Hosahalli, Tadasa and Nandigavi, the lands of which have been taken to constitute the block.

2. Long after the announcement, the villagers claimed certain rights of way and to water in certain kattes and hallas and the exclusion of certain survey numbers from the Forest to provide sufficient grazing for the cattle. The Deputy Commissioner, while doubting the propriety of admitting the claims as they were not advanced before the Forest Settlement Officer and were made long after the expiry of the period allowed for the appeals, nevertheless recommends for favourable consideration the recognition of some of these rights.

3. The Revenue Commissioner is of opinion that, unless there is some administrative objection to the reservation, it is wrong on principle to allow individual claims to easementary rights.

4. The Conservator of Forests also objects to any of these claims being allowed and is also of opinion that the concessions already made by the Settlement Officer are far in excess of the requirements of the villagers. He has however recommended that a right of way, 12 feet wide, to the Ranganathaswami temple on the Koramoragudda in the Forest may be allowed in the case of the Tadasa villagers.

5. The representation made by the villagers to the Deputy Commissioner through the Deputy Amildar of Yedahalli after the papers were referred by the Revenue Commissioner for opinion to the Deputy Commissioner when the latter officer had finally submitted the settlement report in his capacity as the immediate appellate authority of Settlement Officer, cannot be regarded as claims requiring any adjudication.

6. The Settlement Officer has, in accordance with the directions contained in Government Proceedings No. R. 3567—Ft. 211-05-4, dated the 2nd October 1906, recorded in the settlement proceedings that a right of way, 12 feet wide, for men and cattle to the Ranganathaswami temple in question, should be allowed throughout the year together with an extent of 4,840 square yards as camping ground around the shrine.

7. It is also stated by the Settlement Officer that Kowlapur tank, Keswankatte, Godankatte and Ooramundinahalla the right to the use of water in which had been claimed by the villagers, fall outside the settled line of the block and do not require to be provided for in the B. Register.

8. The original settlement has made sufficient provision for all local needs and the revision subsequently effected has obviated all hardships. Government do not consider that any further concessions are necessary. They are therefore pleased to approve of the settlement.

9. The draft notification submitted by the Settlement Officer will be published as hereunder in the *Mysore Gazette*, the 1st April 1907 being entered as the date from which the block shall be declared a State Forest.

10. The Deputy Commissioner of the Kadur District is requested to promulgate the boundaries of the Forest together with the reservation of the right of way made on behalf of the villagers, in the localities in which the block is situated.

Letter No. 5858, dated the 2nd February 1907, from the Conservator of Forests in Mysore, submitting his inspection report of the Kolar District Forest Office.

No. R. 8124-32—FT. 39-06-9, DATED BANGALORE, 8TH MARCH 1907.

ORDER THEREON.—Recorded. It is unsatisfactory that the District Forest Officer should have omitted to maintain so many registers and forms prescribed by the Forest Code and standing orders.

2. (Para 19). The absence of any check in the permits issued and returned is likely to lead to serious irregularities and afford scope for fraudulent practices. The Conservator is therefore requested to see that the register is maintained and the checking of the permits is done systematically.

3. (Para 12). The latest dates of such check might have been given. There ought to be a regular rotation of such checking.

4. (Para 16). All the same the stock in the depots should be regularly and periodically checked.

5. The observations of the Conservator at para 46 of his notes are commended to Deputy Commissioners of Districts.

6. The Conservator will be good enough to arrange for another inspection six months hence with a view to seeing to what extent the defects now noticed have been rectified.

(2) Note dated the 27th February 1907, by the Officer in charge of the Comptroller's office recording his opinion.

No. R. 8392-3—FT. 122-06-2, DATED BANGALORE, 16TH MARCH 1907.

ORDER THEREON.—For the purpose of allowing a fixed horse allowance to Rangers serving in the malnad, the marginally noted nine Ranges were directed in Government Order No. 3502-3—Ft. F. 53-95, dated the 27th October 1900, to be treated as malnad. Some of these Ranges have been lately split up into two Range charges and the Conservator requests that Hunsur, which is regarded as semi-malnad may also be treated as malnad. Government agree with the Conservator that the conditions under which Forest work has to be carried on at Hunsur deserve such a concession so as to allow the special rate of horse allowance for malnad to be drawn by the Rangers. The Comptroller has also no objection to the proposal.

(1) Letter No. 3108, dated the 1st November 1906, from the Conservator of Forests in Mysore, on the subject of working the contract with Messrs. Nagappa and Venkatasawmi Naidu for exploiting giant teak trees from the Kakankote State Forest in the Mysore District.

(2) Letter, dated the 9th November 1906, from Messrs. Nagappa and Venkatasawmi Naidu on the same subject.

(3) Note, dated the 20th February 1907, by the Conservator of Forests.

No. R. 8682-4—FT. 93-06-3, DATED BANGALORE, 21ST MARCH 1207.

ORDER THEREON.—The terms of the original contract executed by Messrs. Nagappa and Venkatasawmi Naidu are given in Government Order No. 289-90—3262-3, dated the 11th November 1903. Under this contract they agreed to take one lakh cubic feet and above of giant teak trees cut in the KakankoteForest, to manufacture sleepers and scantlings out of them in the forest itself, and to pay Rs. 1-5-0 per sleeper measuring 6′ × 8″ × 4½″ and 12 annas per cubic foot of scantlings, the cost of preparation and carting being borne by them.

2. Owing to certain losses sustained by the contractors and to the difficulties experienced in working out the above contract with Government and also their contract for sleepers with the Southern Mahratta Railway, a concession was sought for and sanctioned in Government Order No. R. 751-3—Ft. 9-04-2, dated the 29th July 1904. The concession consisted in allowing the contractors to take dead and fallen trees picked up in the State Forests and to cut standing trees in the forests situated in the eastern boundary of the Kakankote and Metikuppe State Forests, which were stated to be inferior, being full of stunted and otherwise ill-grown teak. The rates and terms of this concession were the same as those for the giant teak and the quantity was limited to that required for 25,000 sleepers. The term originally fixed to expire on 31st December 1904 was extended to 31st December 1905. The Conservator now states that this contract has lapsed and it is not proposed to renew it.

3. With regard to the original contract for giant teak trees, it appears from para 2 of the Conservator's letter under reference that only 12,419 cubic feet of wrought wood are stated to have been brought into Mysore and paid for to Government. Owing to the manner in which the contractors have tried their best to carry on the contract in spite of their difficulty to get labor owing to constant illness and losses in machinery by failure of the firm to which they had entrusted its export, further concessions are asked for and recommended by the Conservator of Forests to enable them to recoup the losses they have sustained and also to facilitate the removal of the giant teak trees, which for want of extraction are annually decaying and are thus a source of waste in the forests. The concessions recommended are:—

(*a*) To extend the time limit of the contract to the end of June 1908.

(*b*) To levy the Government dues at a seigniorage rate to be calculated on the logs appropriated by the contractors, in the jungle, instead of on the wrought timber brought into Mysore.

(*c*) To fix that rate at 9 annas per cubic foot.

The contractors state that if the rate is more than 8 annas, they will not derive any profit from the contract.

4. Government are pleased to extend the period of the contract till the end of June 1908. If necessary, in a sympathetic regard to these contractors, the concessions may be applied also to "dead and fallen trees" in addition to "giant teak trees." The logs and scantlings from giant trees should be carted by the contractors to the Mysore Depot, under passes issued by local Forest officers. At Mysore they will be entered in the Depot register and handed over to the contractors on presentation of Treasury receipts for their price paid into the Treasury. For all account purposes they will be treated as timber extracted departmentlaly. No fresh fellings of trees should be allowed. After the 30th June 1908, the contractors shall forfeit all claim to any timber lying either in the forest or at the Mysore Depot, which shall become the absolute property of Government.

5. Regarding the rate, the scantlings will be sold at 12 annas as at present, in order to enable the Department to dispose of unsound timber and branch pieces which cannot be converted into logs. As regards timber in logs, the giant teak may be cut up in the jungle into pieces of dimensions convenient for transport, of which a minimum should be fixed by the Conservator. Both the giant teak and the dead and fallen trees should be delivered to the Forest Department and then sold to the contractors for a rate which may be fixed with the utmost sympathy for the losses to which the contractors have been put in the past and regard for the expediency of encouraging local enterprise, and in doing so the Conservator should give due weight to the representation of the contractors that the rate proposed by him will be quite unprofitable to them. The rate finally agreed not below the one offered by the contractors may be reported for the information of Government.

6. As regards the sawing machinery, the Conservator is requested to furnish Government with his opinion on the proposal of the contractors.

2. Of the 31 cases pending, four have been since disposed of by Government and the issue of final notification has been ordered. Of the remaining 27 cases, seven belong to the year 1902, six to the year 1903, and six to the year 1904. Of these, six of 1902, three of 1903 and three of 1904, are pending with the Settlement Officer himself. He should devote immediate attention to the completion of the proceedings in these and send up final reports. The other officers with whom the remaining cases are pending are also requested to expedite the submission of their reports as Government are anxious that the settlement of all the forests which have been notified in previous years should receive the final orders of Government without undue delay.

3. With regard to the Govkunte-Gollahalli Forest in the Kolar District, the remark "the sketch of the forest has not been received" has been appearing month and after month. Instead of furnishing the sketch, the District Forest Officer of Kolar submitted modified proposals and requested that the block may be notified afresh, under Section 4 with the additional area proposed by him. The idea did not commend itself to Government, and the Forest Settlement Officer has been requested to complete the settlement and submit the final notification without any dealy. It is hoped that there will be no further impediment to the close of the proceedings in the case.

No. R. 3760-4—Ft. 19-06-10, dated Bangalore, 25th March 1907.

Order thereon.—The Revenue Commissioner thinks that if the enquiry be confined to the claims put forward before the Settlement Officer, there is a danger of the actual necessities of the people living in the locality and their immemorial privileges being ignored, as many of the villagers are too ignorant to realize the effect of such settlement on their rights and privileges. In recent orders Government have impressed upon the Settlement Officer the desirability of acting on this as a safe principle. The proposed block intervenes between Metikuppe State Forest proper and its extension on the eastern side. The grazing lands left are sufficient, as will be apparent by a reference to the C Register. The villagers had their shanbhogs to urge their wants, and it is doubtful, if they were deprived of any of their privileges, they would have been silent. The Amildar of Heggaddevankote is also said to have been present at the time of the enquiry. There does not seem to be any necessity to return the settlement proceedings for further enquiry.

2. With regard to the defect in procedure in allowing the shanbhogs to represent the claims on behalf of the villagers, it is doubtful if under the circumstances it should be allowed to vitiate the proceedings. The patels were present. As they were too ignorant to represent the claims of the villagers properly, the shanbhogs appear to have been allowed to do so to the advantage of the villagers. The claims may therefore be regarded as having been really preferred by the patels.

3. With the foregoing observations, the settlement effected by the Forest Settlement Officer is approved and the draft notification defining the boundaries of the Forest in question will be published in the *Mysore Gazette*, as hereunder, the 1st of May 1907 being fixed as the date from which the Forest shall be declared a State Forest.

4. The Deputy Commissioner of the Mysore District is requested to promulgate the boundaries of the Forest in question in the localities in which it is situated.

5. The total area comprised in the Forest is as detailed below :—

Kharab acres 7,668, guntas 35, or 11·98 square miles.

SECTION 5—REVENUE MISCELLANEOUS

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

1. Government Order No. 6156-65—Mis. 578-03-37, dated the 17th January 1905, issuing a list of tanks in the Ramasagara series of the Palar basin in the Kolar District, the breaching of which may cause danger to life and property in British Territory.

2. Government Order No. R. 9255—Mis. 675-04-2, dated the 28th March 1905, issuing a list of tanks supplementary to the list given in the Government Order read above.

3. Government Order No. 3865-74—R. M. 110-06-5, dated the 13th October 1906, issuing a list of tanks in the North and South Pennar basins, Kolar District, telegraphic notice of danger to which has to be furnished to the British authorities.

4. Letter No. 313, dated the 12th January 1907, from the Chief Engineer in Mysore, furnishing, as requested, a consolidated list of all the tanks in the State the breaching of which may cause danger to life and property in British Territory.

No. R. 7965-74—R. M. 110-06-9, DATED BANGALORE, 4TH MARCH 1907.

ORDER THEREON.—In supersession of previous lists, Government are pleased to issue the accompanying revised list of tanks the apprehended danger to which has to be intimated to the British authorities, as their breach is likely to affect the safety of life and property in British India.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

Correspondence ending with letter No. 6029, dated the 4th December 1906, from the Revenue Commissioner in Mysore, suggesting that a rule under clause (n) of Section 233 of the Land Revenue Code should be made to regulate the payment of expenses to a witness summoned before a Revenue Court otherwise than at the instance of a party.

No. R. 8866-74—R. M. 133-06-4, DATED BANGALORE, 28TH MARCH 1907.

ORDER THEREON.—There is no provision in the Land Revenue Code or Rules regulating the payment of expenses of witnesses in cases of the kind in question, and Government argee with the Revenue Commissioner that in order to avoid undue hardship to witnesses, and induce them to attend readily, it is desirable to make a rule on the subject under Section 233 (n) of the Land Revenue Code so as to enable Revenue Courts to direct the payment by one of the parties of the expenses of a witness summoned otherwise than at the instance of a party. Under Rule 102 of the Land Revenue Rules, the payment of the expenses of witnesses summoned by the parties in Revenue proceedings, is apparently to be regulated by Sections 160 to 162 of the Code of Civil Procedure, but even with regard to this, no scale of expenses has hitherto been laid down by any rule or order issued in this behalf. Government are therefore pleased to direct that the following rule with regard to the payment of witnesses' expenses generally be added to the Land Revenue Rules after the present Rule 101.

"101 A. The payment of the expenses of witnesses summoned to appear before a Revenue Court or authority, in any enquiry, suit or other proceeding, at the instance of any party, shall be regulated by Sections 160 to 162 of the Code of Civil Procedure; and the scale of such expenses shall not exceed the scale from time to time prescribed for Civil Courts by the Chief Court.

In the case of witnesses summoned otherwise than at the instance of a party, the Revenue Court or authority may order, for reasons to be recorded by it, that the expenses of such witnesses be made costs in the enquiry, suit or proceeding and be paid by such of the parties as it may direct or by Government."

2. A Notification to the above effect will be published in the Gazette.

SECTION 1—GENERAL FINANCE

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 3967—B. & R. 603, dated 17th July 1907, from the Comptroller to the Government of His Highness the Maharaja of Mysore, submitting a report on the movement of funds and resource operations of the Treasuries in the State for 1905-06.

"1. I have the honor to submit the following Report on the Resource Operations of the Treasuries in the State for the year 1905-06:—

2. *Minimum Balances.*—These are the estimated balances fixed in the Report for 1903-04 and so far there has been no necessity to make any alterations in them. The working balances of the last four months of the current official year will however have to be maintained at a higher level in view of the expenditure in those months on the third installation of the Cauvery Power Scheme recently sanctioned by Government.

3. The accompanying table A shows the estimated balance for each month and its distribution among the several treasuries. The actuals on the 1st of each month are also herein compared with the estimated minimum. This comparison shows that there are large variations from the estimate and these are mostly due to the lump additions not having yet been distributed, as the Government Orders on the report for 1903-04 were received only on the 29th of March 1906 and there was not sufficient time to communicate with the Treasury officers and obtain their reports in the matter. It is therefore proposed to make the distribution during the current official year.

4. It will be noticed from this statement that the actual balance on the 1st of February 1906 went below the prescribed minimum by about 2½ lakhs, and this fact may naturally lead us to think that it may be possible to reduce in future years our estimated minimum for the month to that extent. But the circumstances of the year under report were peculiar and the strain on the Treasuries was great, as it was necessary to arrange for large amounts being concentrated in the Bangalore and Mysore Treasuries in order to meet the special heavy expenditure, in connection with the visit of Their Royal Highnesses the Prince and Princess of Wales, besides the payment on account of the first instalment of the subsidy falling due on the 31st January. As already stated in the previous report, the experience of working the Treasuries in the past two years has left the impression that it is not safe to bring down the District Treasury balances on 1st February to a lower figure than 18 lakhs.

5. *Movement of funds.*—Two statements B and C are attached, the former showing the remittance of both specie and currency notes as also the net remittances, and the latter giving such information only as regards currency notes. As usual, the demand for both specie and currency notes was great in Bangalore and Mysore, while in Kadur and Chitaldrug the demand was for specie.

6. Compared with last year the inward remittances were less by 9,96 while the outward increased by 3,10, thus showing that the District Treasuries were on the whole better off during the year. With a view to avoid all unnecessary remittances great vigilance was exercised in the matter of remittances and the result was that the cost of the remittance during the year was only Rs. 6,742 against Rs. 7,593 in the previous year.

7. In para 2 of Government Order No. Fl. 6798—G. F. 155-05-2, dated the 16th April 1906, it was stated that on the receipt of the report called for from this office as regards supply bills, Government would take the necessary steps to ascertain how the trade of the country is financed and determine how far the issue of supply bills is feasible. This report has since been submitted and the Orders of Government in the matter are awaited.

8. Hitherto the demand for supply bills was only from the Agent of the Bank of Madras, Bangalore, and that too on rare occasions. But during the year under report the Agent of Messrs. Binny and Company, at Mysore, having applied for the issue of such bills, the application was granted by the Comptroller as a tentative measure. Bills for more than 1½ lakhs of rupees were issued during the year and the State gained a sum of Rs. 205 as premia, besides the saving in the Remittance charge.

9. Statement D shows the absorption of small silver and copper during the year. As stated in the reports of previous years, the figures do not represent the actual absorption in the Province as they do not exclude, for want of information, the coins which find their way into the border Districts of the Bombay and Madras Presidencies and as they do not include important imports through private agency.

Leaving the State Huzur Treasury, which is a reserve Treasury and as such freely issues small silver and copper to the District Treasuries and also to the Bangalore public, the largest consumption is in the Kadur District which is the largest centre of the coffee industry in the State. Next comes the Chitaldrug District which on account of the Marikanave Resevoir Works takes a large quantity of these coins. As compared with the previous year, the absorption was on the whole larger in 1905-06 probably on account of the adverse season and the consequent expansion of the ordinary Public Works"

No. Fl. 6564—Gen. Fin. 221-06-2, dated Bangalore, 2nd March 1907.

Order thereon.—Recorded.

2. Government note with satisfaction that proper vigilance was exercised in the matter of avoiding all unnecessary remittances from Treasury to Treasury, and that as a result the cost of remittance was less by about Rs. 800 than in the previous year.

3. The question of the issue of supply bills alluded to in para 7 of the report, is reserved for separate consideration pending the arrival of the new Comptroller.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Comptroller to the Government of His Highness the Maharaja of Mysore.

Read—

Letter No. 7888, dated the 22nd January 1907, from the Revenue Commissioner in Mysore, submitting under para 6 of Government Order No. 3228-37—G. F. 134-06-1, dated the 3rd November 1906, the Comptroller's Report No. 3200-714, dated the 6th December 1906, with its enclosures reviewing the work of the Treasuries in the State for the year 1905-06:—

"I have the honor to submit herewith letter No. 3200—714, dated 6th December 1906, (with its enclosures) reviewing the work of the Treasuries in the State for the year 1905-06, and to state that I have nothing to add to the report inasmuch as the Administration of the Treasuries was transferred to me only recently by Government in their Proceedings No. Fl. 3228-37—G. F. 134-06-1, dated 3rd November 1906, and as I had in the meanwhile no opportunity to make any Treasury inspection and did not receive any District Treasury inspection reports from the Deputy Commissioners.

2. The report of the Comptroller shows that there has been no perceptible improvement in the working of the Treasuries. If the officers in charge of Treasuries were fully conversant with the Treasury rules and procedure, and paid personal attention to the instructions and remarks of the Comptroller, instead of relying too much on their subordinates, the working of the Treasuries would be much more satisfactory than it now is. As a first step in this direction, I think that the question of training the Treasury Officers, which is before Government, requires early disposal. When this is done, it would be unnecessary to place an Assistant Comptroller in charge of the Mysore District Treasury as proposed by the Comptroller. Further, as the Assistant Commissioner now in charge of this Treasury is an intelligent and capable officer of experience, the step seems to be uncalled for. In the Comptroller's letter No. 188, dated 10th July 1901, (printed in Government Proceedings dated 8th January 1902, No. Fl. 955-63—R. F. 213-92) certain proposals were made for amalgamating the Treasury Accounts and Revenue Accounts Sections, in District Offices, and generally for promoting the efficiency in the working of the Treasuries. It will add to administrative efficiency if Government are able to pass final orders on these proposals. I need not repeat that unless the efficiency of the personnel from the Nagadi gumasta in the taluk to the Treasury Officer in the district, is steadily improved on the lines sketched out by the Comptroller, no real progress can be expected.

3. I shall issue a Circular to Deputy Commissioners of Districts requesting them to submit half-yearly inspection reports of District Treasuries in future."

(*Enclosures.*)

Letter No. 3200—714, dated the 6th December 1906, from the Comptroller of Mysore to the Revenue Commissioner in Mysore:—

"With reference to para 6 of Government Order No. Fl. 3228-37—Gen. Fin. 134-06-2, dated the 3rd November 1906, I have the honor to forward herewith my review of the working of the Treasuries in the Province for the year 1905-06, for incorporation in your report to be submitted to Government. This review was hitherto submitted to Government direct under Article 1003 of the Civil Account Code and was due by the 15th December.

2. Statements A, B, C and D appended to this review show in a tabular form the chief defects observed during the course of audit of the bills paid at the Treasuries and the delay in the submission of the periodical returns rendered to this office. In Statement E is shown the names of officers who were in charge of the District Treasuries during the year under review, and the period for which each was in charge.

3. *Lists of payments and the cash accounts.*—There has been an increase in the average delay in the submission of the first list of payments in all the districts except Mysore and Hassan, as compared with the previous year. These were received in time from the Mysore District for nine months in the year, while for the remaining three months there was a delay of 13, 14 and 15 days respectively. Though the average delay in the Hassan District is less than for the preceding year, yet it is more than for any other district. The second list of payments and the cash accounts were received fairly well in time from Bangalore, where there was a slight delay only in the earlier months of the year, Kadur and Chitaldrug, and there was no delay at all in their submission in the Shimoga District Treasury. The delay in the other districts, notably Kolar and Mysore, is unsatisfactory. In this office review of the working of the Treasuries for the year 1903-04, it was observed that no amount of circulars, requisitions and reminders from this office for securing the punctual despatch of these returns has had the desired effect. Though the inordinate delay in some of the District Treasuries has to some extent been minimized, yet there has been no perceptible improvement on the whole since 1903-04. The submission of the lists of payments and the cash accounts on due dates should be the rule and not the exception to the rule, and until this is secured, no improvement could be assumed to have been effected.

4. *Vouchers and subsidiary statements.*—These should, under Article 326 of the Civil Account Code, be forwarded with the list of payments and the cash accounts respectively, the former on the 10th or the 11th of the month to which they relate, and the latter on the first working day of the

following month. The omission in this respect as revealed by the number of vouchers and statements on the average per month, which were not received on due dates shown in column 2 of Statements A and B, is not satisfactory. A comparison of the number of schedules and vouchers on the average per month which were not received on due dates with that for the past year, shows that Shimoga and Kadur are the only districts that were pretty prompt in submitting these documents in time, that there has been little or no improvement in Bangalore, Kolar, Tumkur and Chitaldrug, while in Mysore and Hassan there has been marked retrogression. In this connection I would invite your attention to the 3rd and 4th paragraphs of this office review for the year 1903-04, in which the causes contributing to the delay in the submission of the vouchers have been explained. This standing defect throws additional work on this office by multiplying correspondence and necessitating the frequent correction of the accounts compiled by this office. Special mention was made of the defects and drawbacks in the Mysore District in the reviews for the past two years. The state of things in this District Treasury has in no way bettered. The average number of schedules the transmission of which was delayed rose from 85 in the year 1904-05 to 100 in the year under report. Monthly requisitions for wanting schedules and vouchers and the issue of repeated reminders have become a necessity in this district. Some idea of the existing state of affairs in this district may be formed when it is stated that seven vouchers for January 1906, one for February, two for March, four for April and three for May were not received in this office up to the date of the compilation of this review, and the statement of sums credited to advances recoverable for July 1906, due on the 10th August last, has not been forwarded up to date. The non-receipt of the latter has retarded the closing of the objection books of the Mysore District for July, which should ordinarily have been closed by the 20th of September. The objection books for July, have therefore not been closed up to date, and in consequence those for the subsequent months also for which accounts have been received. To effect some improvement in the worknig of the Mysore District Treasury, I had lately suggested to Government that one of my assistants may be placed in charge of this District Treasury for a year or two. But my suggestion was not accepted. As the administration of the Treasuries is now entirely vested in you, I commend the matter for your special consideration.

Some of the schedules in the Mysore District which were received after a long delay, were imperfect or incomplete and had to be returned for correction or for supplying the omissions.

5. *Annual returns (Statement C).*—With the exception of Shimoga, Kadur and Chitaldrug Districts, there has generally been considerable delay in the submission of these returns. There has been a delay of as many as five months and thirteen days in the despatch of some of the returns in the Kolar District. While in the other districts one or the other of the returns have been submitted promptly, there has been delay in the submission of all the returns in the Mysore and Hassan Districts. As a separate report has been submitted to Government on the working of the Savings Banks in the Province, the dates of receipt of the annual statements of the Savings Banks Accounts from the Treasuries have not been shown in Statement C. These were all received in time to enable this office to submit the report to Government on the due date. There was a delay of only one week in Bangalore and Shimoga and about three weeks in the other District Treasuries.

6. *Objection statements and audit memoranda.*—The delay in the return of the objection statements each month, with reference to each list of payments is shown in Statement D. These should, under Article 15 of the Civil Account Code, be returned within a week, and the period fixed in Government Order No. Fl. 3889-97—Gen. Fin. 252-04-2, dated the 20th December 1905, reviewing this office report on the working of the Treasuries for the year 1903-04, is a fortnight for the return of the audit memoranda issued monthly, and two months for the disposal of the half-yearly review of objections outstanding. The delay in the Bangalore District has ranged from fifteen days to seven months, while in the Mysore District it has gone up to nine months. No useful comparison of the figures in Statement D relatively to each district can be made, as the delay is greater in the Treasuries in which the number of objections raised is larger. For instance, there was no delay for seven months in the year under review in the Kadur District, and the delay in the Chitaldrug District is comparatively less. But on examining the figures in columns 5, 6 and 7 of Statement B, it will be seen that the number of objections raised is very small for these districts. Judged by the number of objections, the delay noticeable in the return of the objection statements of the Kolar and Tumkur Districts is not creditable to these District Treasuries. It is needless to add that the delay in the return of these statements necessitates the retention of the items objected to in the objection books of this office for unusually long periods.

In column 4 (C) of Statement B is shown the total number of objection statements and audit memoranda that were not returned on due dates both by the Treasury Officers and other officers to whom they were issued. In the Kolar, Shimoga, Chitaldrug, Mysore and Hassan District Treasuries there was delay in the return of all the objection statements issued by this office; in the Bangalore District Treasury only three out of thirteen were returned in time; and in Tumkur only two out of fourteen were so returned. Eight out of the thirteen statements issued to the Kadur District Treasury were received in time. It having been observed that the practice hitherto observed of communicating invariably through the Treasury the objections for which the head of an office or department and not the Treasury is responsible, augments delay, these objections are now communicated direct to the officers concerned agreeably to Article 967 of the Civil Account Code.

7. *Items objected: Miscellaneous.*—The nature and number of these items are shown in columns 5, 6 and 7 of Statement B. I am not prepared to draw any inference from these figures as to the relative efficiency of the several Treasuries. I find that the number of objections raised in the districts the auditors of the accounts of which in my office possess greater aptitude and capabilities than the others, is larger, while in the other districts it is small. As the audit in my office has not attained the general and uniform standard of efficiency observed in the British Indian Account offices, no inference of a general applicability can be drawn from these figures.

It may here be noticed that in disposing of objections the Deputy Commissioners Treasury Department, simply forward the replies received from the Amildars or other officers without further investigation and the replies to the objections bear no evidence of any check or scrutiny exercised in

their offices. Circular instructions were issued inviting their attention to Article 302 of the Civil Account Code, which requires that when an irregularity of any kind is brought to their notice, nothing but a report on their own knowledge, after personal investigation, can be considered satisfactory, but they remain practically unheeded.

8. *Concluding remarks.*—It was pointed out in the review for the past year that the quality of the work turned out in the Treasuries is still far below the normal standard and that among the circumstances which seem to have combined to bring about this unsatisfactory result, the frequent changes of officers presiding over the Treasury or want of knowledge of the Treasury work on their part, due to their lack of interest in it, contributes a great deal. There have been as many, if not more fequent changes of officers in the year under review as in the past year. The scheme of training of Treasury Officers, which I had drafted and which I referred to in my report of last year, is still before Government.

No. Fl. 6767-75—Gen. Fin. 224-06-2, dated Bangalore, 8th March 1907.

Order thereon.—Government note with regret that the Comptroller's report shows that there has been no perceptible improvement on the whole in the working of Treasuries since 1903-04. The importance of the punctual submission of the list of payments and the cash accounts on due dates cannot be too strongly impressed on Treasury Officers, and this should be insisted on.

2. The vouchers and subsidiary statements should, under Article 326 of the Civil Account Code, be forwarded together with the list of payments and the cash accounts respectively. The omission in this respect as disclosed in the statements received from the Comptroller is not satisfactory. The Revenue Commissioner is requested to take proper notice of the omission and neglect on the part of all the Treasury Officers in general and that of the Treasury Officer, Mysore District, in particular, so as to ensure that the recurrence of the defects noticed by the Comptroller is effectually prevented.

3. In regard to the delay in the return of objection statements and audit memoranda, the Treasury Officers must be made to distinctly understand that it necessitates the retention of the objected items unadjusted for unusually long periods. The procedure prescribed in Article 15 of the Civil Account Code should be scrupulously observed.

4. The Comptroller observes that in disposing of objections, the Deputy Commissioners, Treasury Department, simply forward the replies received from the Amildars and other officers without further investigation, and that the replies to the objections bear no evidence of any check or scrutiny having been exercised in their offices. It is also reported that the circular instructions issued by the Comptroller in this matter remain practically unheeded. The Revenue Commissioner is requested to see that in future the provisions of Article 302, Civil Account Code, are strictly complied with by the Treasury Officers in the disposal of objections.

5. Orders will issue in due course regarding the training of Treasury Officers, a subject referred to in para 2 of the Revenue Commissioner's letter and which is under the consideration of Government.

6. The proposal to amalgamate the Revenue Account and the Treasury Account branches of the District Office, which the Revenue Commissioner states will promote efficiency in the working of the Treasuries, has, on careful consideration, and in consultation with the late Comptroller, been decided to be unsuitable for adoption.

K. S. CHANDRASEKHARA AIYAR,

Letter No. 2830, dated the 22nd January 1907, from the Military Assistant to Government, forwarding his memo No 177, dated 26th December 1906, regarding the revision of the out-door establishment attached to the Government House at Mysore with a proposition statement duly verified by the Comptroller.

Memorandum to the Dewan of Mysore, No. 177, dated 26th December 1906.

Subject.

Revision of the out-door establishment attached to the Government House at Mysore.

With reference to the Dewan's Orders on my memo No. 10, dated 12th July 1906, I submit herewith a proposition statement duly verified by the Comptroller showing the extra establishment required in connection with the Government House at Mysore.

In my memo referred to above I recommended the four watchmen to be brought on the permanent establishment, but on a consideration of the matter I find that this will not be necessary, as being Military pensioners, they could be kept on the temporary non-pensionable establishment and paid from contingent grants.

I have also provided for—

1 Tindal on Rs. 10 and

2 Lascars on Rs 8 each

and an increase of Re. 1 to the present lascar with effect from 1st July next. I find these additional hands necessary for reasons stated in the proposition statement.

I trust you will kindly sanction the small permanent increase of Rs. 27 per mensem I have proposed for the care of the valuable tents attached to Government. The salaries of these men during the current official year will be met from the grant provided for entertainments.

Statement of proposition for revision of establishment.

Name of office to which the proposition relates :—Government House, Mysore.

the entertainment of one tindal on Rs. 10 and two lascars on Rs. 8 each and the revision of pay of the existing lascar from Rs. 7 to Rs. 8, with a total increase of cost of Rs. 27 per mensem.

2. The Military Assistant is also permitted to employ four watchmen for guarding purposes at monthly wages not exceeding Rs. 8 per mensem each and meet their cost out of the grant annually provided for entertainments. The Comptroller will, under Article 98 (M) Civil Account Code, admit the said charges in the detailed contingent bills on the strength of the disburser's certificate that the charges have been duly incurred and paid.

No. Fl. 6878-88, dated the 14th March 1907.

Order.—The Government of His Highness the Maharaja have had under their consideration for some time past the question of the abolition of the *halat* duty on arecanut (*supari*), and how best to carry out, without embarrassment to the State's finances, a reform, which, apart from individual differences of opinion as to the actual incidence of the duty, is recognized by all competent authorities as one of pressing administrative necessity and of far-reaching importance.

2. The separate memorandum annexed shows in a succinct form the nature and origin of the *halat* on *supari*, the administrative and economic evils which its retention entails, and the endeavours made in the past to mitigate them. It is here sufficient to remark that the process of declension in the condition of the people of the Malnad, which first attracted notice more than twenty years ago, and which led to special enquiries being instituted as to the causes of such declension and the remedies that should be applied, has become increasingly marked in recent years, so much so as to threaten the extinction of the *supari* industry. It is notorious that the population in the Malnad is decreasing, and the general condition is one of increasing poverty and inability to tide over seasons even of temporary distress. The drought of the last two seasons particularly has very severely affected the garden owners, and it will take them some years to recover from the destruction wrought by the loss of the normal water-supply, for, where trees have not been actually killed, their vitality has been so impaired that they are likely to produce little or no crop for some time to come. In these circumstances, the Government are convinced that the relief, to which the people of the Malnad have so long been anxiously looking forward, can no longer be postponed without serious consequences.

3. The chief difficulty that has hitherto stood in the way of effective relief being attempted has been the fact that a considerable revenue (nearly 3½ lakhs of rupees per annum) was being realized from this item of taxation, which it was felt the State could ill afford to forego in the then condition of its finances. His Highness' Government have since carefully gone into the question; and as a result of the enquiries instituted, which embraced the existing financial position, the prospects of the immediate future, and the measures necessary to place the finances generally on a sound footing (such as the reforms in the direction of retrenchment of expenditure in all departments, already in active progress), they have arrived at the conclusion that they can now safely afford to forego the entire revenue from the *halat* without unduly disturbing the position of the finances.

4. The Government have, therefore, great pleasure in announcing that the *halat* on *supari* will be abolished with effect from the official year 1907-08. At the same time, they direct that, in view of the immense benefit, amounting to the remission of a sum nearly equal to the assessment on the garden lands, which this measure will confer on garden owners, the latter be asked to contribute a small cess to provide a fund for the scientific investigation of *supari* garden problems, such

as those connected with *supari* cultivation, diseases to which *supari* is liable, and the like. The cess will be fixed at present at one anna on every rupee of assessment on *supari* garden lands, and the proceeds will be set apart for the special purpose alluded to. The Deputy Commissioners of Districts are requested to take the needful action in communication with the Survey Department to give effect to this order.

5. The establishments employed in connection with the collection of the *halat* will be dispensed with on the 1st July 1907. Deputy Commissioners should, however, endeavour to find other employments for as many of the men thrown out as possible in the Revenue or other Departments ; but all those who are not fit for other employment or for whom employment cannot be found, will be retired on compensation or other pension or gratuity to which they may be entitled.

6. The proposals of Deputy Commissioners are awaited as regards the future utilization of the buildings now used as *Kattes*.

APPENDIX.

MEMORANDUM ON THE HISTORY OF THE SUPARI HALAT QUESTION.

Before the year 1831, when Mysore came under British rule, nearly 550 articles including cattle, food-grains, cotton, pepper, etc., were subject to the payment of a duty called the "Sayer" duty. The articles that were liable to pay Sayer duty paid that duty, whether consumed in the State, or exported outside, and the duty was levied as an excise, a transit, or an export duty, according to the destination of the article on which it was levied. The transit duty was abolished nearly sixty years ago, and the number of articles liable to the payment of duty was reduced from time to time, until from the year 1885 supari, *i. e.*, arecanut or betel-nut, has been the only article on which Sayer is being levied. The duty, which until 1875 varied, according to the quality of the produce, from annas 6 to Rs. 1-4-0 per maund of 40 seers of 24 tolas, was in that year fixed at a uniform rate of annas 12 per maund. This is the rate of duty still levied. The revenue derived from 'Sayer' amounted in the year 1863-64 to over 11 lakhs of rupees, and was collected by an establishment costing more than a lakh. With the gradual abolition of the duty on most of the articles, the Sayer revenue has fallen to about 3½ lakhs, for the collection of which there is an establishment costing Rs. 11,676 per year.

2. Arecanut is grown in gardens in all the districts of the State, but chiefly in the malnad taluks of the Kadur and Shimoga Districts and in portions of the Tumkur District. Except in these tracts, the Sayer revenue is collected through the village headmen and the subordinate Revenue officers. But in Kadur and Shimoga and parts of Tumkur, where the revenue to be collected is large, there is a special establishment, the members of which are paid from Rs. 5 to Rs. 15 per month.

3. The greater portion of the supari grown in Mysore finds its way to Bellary, which is the chief mart for the produce. In the Kadur and Shimoga Districts the raiyat sells his produce to a merchant at Birur (Mysore State) or at Bellary, either directly or through a middleman. In either case, when the supari is transported, it has first to be taken to the *Katte* or custom house, where it is weighed and the duty (called *halat*) collected, and a pass is given, under cover of which the article may be removed. If the raiyat carries his produce direct to the merchant, he pays the *halat* in the first instance ; but if a middleman buys the 'supari' from him at the place of production, the *halat* is in the first instance paid by the middleman.

4. It must here be mentioned that only the Mysore article pays *halat*. Supari brought into the State from outside is not subject to the payment of duty. The foreign article, as soon as it enters the Mysore State, is taken to the nearest *katte*, where a free pass is given under cover of which the article may be transported anywhere. This exemption of the foreign article from payment of duty naturally gives occasion to the smuggling of the Mysore produce across the frontier and the disposing of it there or bringing it back into the State as if it were foreign produce. It is believed that there is a certain amount of smuggling going on in frontier taluks. To guard against smuggling a part of the special Sayer establishment is told off for preventive duty on the frontier.

5. But the chief preventive measure consists in the restrictions placed on the garden owners in connection with the picking operations and the disposal of the yield. Just before

the harvest season the Sayer officials inspect every areca garden, estimate the probable yield and enter the estimated quantity for each garden in a register, which is kept by the patel or headman of the village for future reference. Before gathering the produce the owner of the garden informs the patel of his intention to do so. The patel issues a permit, warning the owner at the same time that the produce should not be removed from the garden before he (the patel) has measured it. On the authority of this permit the bunches of arecanut are gathered and the fruit separated. Information is then sent to the patel, who goes to the garden, measures the fruit, estimates the probable quantity of the prepared arecanut, and, after entering these particulars in the permit, gives leave to the owner to prepare the nut for the market. Finally, when the nut is prepared, it is once more weighed by the patel and the Sayer officials, and the total quantity of the actual yield is entered in a *patta* which is given to the garden owner. A register showing the stock with each garden owner is kept with the patel, and the owner is accountable for the quantity shown in the register less a small deduction allowed free of duty for household consumption. Whenever any portion of the nut is sold, the quantity sold is shown by the patel in his register. The stock on hand is examined now and then, and if it does not agree with the net balance according to the register, the owner is made accountable for the deficiency. It is when the *supari* is removed from the raiyat's village that the *halat* on it is levied at the *katte*.

6. It has always been recognized that the above procedure causes considerable annoyance to the raiyat. It allows inferior Government servants and the village headmen constantly to interfere with him (1) in his harvest operations, (2) in his dealings with his customers, and (3) with regard to his stock, and affords them many opportunities to worry him in various ways. The Sayer duty on supari has therefore generally been described by revenue officers as harassing, vexatious and inquisitorial; and it is the opinion of some very experienced officers that, for the 3½ lakhs which comes to the Government in the shape of Sayer revenue, the raiyats are actually out of pocket to a much greater extent.

7. Now, the people on whom this heavy burden falls are recognized, on all hands, to be the least capable of bearing it. In the opinion of those who are competent to judge, these arecanut gardens have been very heavily assessed to land revenue, the maximum rate being as high as Rs. 28 per acre against Rs. 15 in the adjoining taluks of North Canara. The sayer represents another Rs. 13 of taxation per acre. Whether as a result of the excessive assessment paid on these gardens for the past several decades, or independently of it, the majority of the malnad garden owners have been for years under the clutches of money lenders. And to add to this, they have suffered much from falling prices, from a disease called *koleroga* which attacks the trees and damages the crop, and from successive years of insufficient rainfall. While the loss caused by a drought to the owner of ordinary dry and wet lands is only temporary—as he can get a bumper crop if there is good rain in the succeeding year,—the loss to the owner of an arecanut garden is permanent, as the trees, raised with much difficulty and at great expense, and without any return for about 12 years, die or lose so much in vitality that no amount of rain in the next year can completely restore them. It may be mentioned in passing that the last year's drought has been so severe that the injury to the arecanut gardens has been almost irreparable. Under all these circumstances the condition of the gardens has steadily deteriorated during the past years, and it has been the opinion of all officers conversant with the supari industry that the malnad garden owners thoroughly deserve some measure of relief.

8. Various measures of relief have been proposed and considered from time to time. In 1891 Mr. Madhava Rao, the present Dewan, was specially deputed to study and report on the condition of the garden owners, the incidence of the garden assessment and sayer duty, and other kindred subjects. He submitted a detailed report and recommended (1) that the garden assessment should be reduced and (2) that the sayer should be abolished or at any rate the rate of duty should be reduced. An alterative proposal was then made by Sir Sheshadri Iyer, who considered that the garden assessment should be reduced to the level of an ordinary wet assessment, and the sayer duty abolished, but a tree-tax levied in lieu of it. After much discussion it was decided in 1896 to leave the Sayer duty alone for the time being, but to reduce the garden assessment in taluks where it was pressing too heavily by about one-third, so that the average rate in the Sorab Taluk for instance was brought down from Rs. 15 to Rs. 10 per acre.

9. It has however been found that this remission of a portion of the garden assessment has not given to the raiyat the full measure of relief that he really stands in need of. The decision to let the Sayer duty alone was chiefly due to the fact that the finances of the State did not allow of the giving up of an item of revenue which yielded 3¼ lakhs to the coffers of the State. With the general improvement of the finances, however, proposals have again been made to do away with the Sayer duty in whole or in part. Two years ago Sir P. N. Krishna Murti proposed to remit about a third of the Sayer revenue and collect the balance in the form of an acreage cess. But it was felt that the raiyat would probably consider his "latter end to be worse than the beginning," since such a cess, unlike the *halat*, would be collected irrespective of the actual yield, and, it may be, before he has had time to realise the price of his produce.

10. A partial reduction of the duty from 12 to 8 annas per maund was recently under consideration as a preliminary to further reduction and final abolition; but as this would leave

the present pernicious system in exactly the same state as at present, this proposal has also been given up. It is now proposed to do away with the Sayer duty entirely and once for all.

11. How far this would benefit the garden owners has to be considered. In accordance with abstract economic laws, every expense that adds to the cost of production falls on the consumer in the long run, and any reduction in this cost must ultimately reduce the price of the commodity for the benefit of the consumer. Some officers whose opinion is entitled to great respect have been of opinion that as a matter of fact the *halat* actually falls on the producer. There has been much controversy on this subject, and a good deal has been written about it. It is difficult to dogmatise on such matters, and it must be remembered that the doctrines of political economy are based on the assumption that competition has full scope and every man knows what is best for himself and acts accordingly. But the malnad raiyat is ignorant and often impecunious, and is entirely in the hands of the middleman, without whose help he is unable to pay the *halat* and place his produce on the market. The abolition of the *halat* will render the producer very little dependent on the middleman, and there is every reason to hope that he will obtain an appreciable measure of relief from the abolition of the *halat*.

12. Mysore supari is admittedly the best in the market, and generally fetches higher prices than the produce of other countries. The highest grade produced in Mysore, called the Deshawar, is absolutely without an equal. The *halat* on this is no doubt paid by the consumer, and a remission of the tax would not directly benefit the producer. But there are certain inferior grades, which on account on the *halat* are, at present, practically unsaleable. Before 1875 the rates of Sayer duty were 6 as., 12 as. and Rs. 1-4-0, for different qualities. The adoption of a uniform rate of 12 annas has undoubtedly pressed hard on the inferior grades. The abolition of *halat* would at once improve the sale of the inferior kinds of supari, and in this way again afford material relief to the producer.

13. Lastly, although it is impossible to say how much of the 3½ lakhs of revenue which the Government propose to give up would go to the areca garden owners, it is certain that it would do away with the present obnoxious and pernicious system, which both harasses and demoralises the people, keeps the cultivator in bondage to the middleman, and places upon him a pecuniary burden which is much greater than the direct yield of the impost to the State.

14. It must be admitted that if it were not for its attendant evils the Sayer duty would be a very convenient method of taxation; and for the people a light land assessment with the sayer duty would have been more welcome than a heavy land assessment without the sayer duty. Sayer has in theory at least its own advantages in that it is regulated by the actual yield, and consequently does not press heavily in a bad year; and it also provides certain safe-guards against theft, since under the Sayer Rules a person will not be able to dispose of supari easily unless his name is in the registers. But although these advantages may be said to exist, the drawbacks of the present system are so great that these advantages must be sacrificed for the sake of relieving the raiyats from an intolerable burden; and as regards the State itself it is confidently hoped that the sacrifice of 3½ lakhs of revenue will be more than compensated for by the increased prosperity of an important and deserving section of the population, which might be safely expected to result from the raiyat being relieved of an impost amounting to Rs. 13 per acre.

SECTION 2—SEPARATE REVENUE

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 3083, dated 25th February 1907, from the Excise Commissioner in Mysore, submitting the record of enquiry relating to the Inamdar's claim to the toddy revenue of the Kayamgutta Taralu village, Kankanhalli Taluk, Bangalore District.

No. FL. 7291-2—S. R. 103-06-2, DATED BANGALORE, 28TH MARCH 1907.

ORDER THEREON.—The investigating officer, Mr. Ananda Rao Sirsi, is of opinion that though the original Sannads were not produced, the Inamdar is entitled to the toddy excise revenue of the village named above, on the ground that the right has been recognised in the Inam Settlement Register and that the holder has been in enjoyment of the same for twelve years preceding 1892-93. Both the Deputy and the Excise Commissioners support this finding. Government are therefore pleased to allow the claim. As the village has only a date grove but no toddy shop, the payment of revenue should be regulated by rules 2, 5 and 13 contained in Government Order Nos. 2074-83—R. F. 166-92, dated 2nd August 1901, and Fl. 1650-9—S. R. 166-92, dated 19th September 1904.

The amount awarded by the investigating officer, *viz.*, Rs. 616-13-10, for the years 1892-93 to 1904-05 requires revision, as the amount advanced to the Inamdar from time to time has not been deducted and the details of calculation for the amount awarded under Rule 13 as revised by Government Order No. Fl. 1650-9—R. F. 166-92, dated 19th September 1904, are not given. A further report at an early date is requested.

SECTION 3—BANKING

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No. 6257, dated the 15th December 1906, from the Revenue Commissioner in Mysore.

I have the honor to forward herewith letter No. 11—Agri. Banks, dated the 10th December 1906, together with its enclosures in original from the Inspector of Agricultural Banks, embodying the report on the working of the Agricultural Banks in the State during the year 1905-06, with the following observations.

2. *Decay of the Banks.*—It is a matter for regret that all the Banks are, at best, but stationary, and show no signs of developing an independent vitality of their own. With the recovery of successive instalments of Government loan, the formation of the Reserve Fund being indefinitely postponed and no deposits coming in from the members or others, the natural death of these Banks would appear to be the only result.

3. The report itself is naturally very meagre, as all the necessary statements were not received from the districts, the Mysore District being the worst in this respect.

4. The importance of periodically revising the estimate of the value of the property of members of the Banks and of keeping a watch over changes in the cultivation and value of such property is very great from the point of view of Government as the sole creditor of these Banks. It is very doubtful if the value of the property given in the report represents their present market value. I shall arrange in future for the annual appraising of the property by the jamabandi officers at the time of jamabandi.

5. As regards the use of the Reserve Fund for purposes of loans to members, which is stated in the report to be against the standing orders of Government, I should consider that, so long as the loans to members do not exceed the prescribed maximum limit as per Rule 42, the use of such Reserve Fund by way of loans to members is not only not contrary to Rule 56, but it is also legitimate and profitable to the Bank. The Reserve Fund is, in fact, intended to "go towards the reduction of loans and deposits required for carrying on the business of the Banks."

6. *Deposits.*—The influx of deposits from members is not at all encouraging especially in the Bangalore District where it is disproportionately small.

7. The statements *re* recovery of loans (principal and interest) given in paras 10, 15 and 16 of the report are not properly differentiated from one another, and they could not be clearly made out. Anyhow the repayment of instalments of Government loan is neither full nor made punctually. It is very necessary to adopt a procedure for enforcing prompt payment without having recourse to the winding up of the Bank.

8. *Income and surplus.*—In showing amounts under "Income" and "Surplus" there is a perceptible confusion between the amount actually recovered and that not so recovered though it has fallen due. It is desirable that these items should be shown separately.

9. *Statements of receipts and expenditure.*—In the case of some of the Banks, (*e.g.*, those of Hulkunte and Tyamagondlu) the total expenditure was found to exceed the total receipt. It is not clear how this could have come about.

10. *Inspection.*—There seems to be no regular periodical inspection of the Banks. I shall arrange for their systematic inspection in future, so that none of the Banks may escape inspection for a continuously long period.

11. Now that all the Agricultural Banks have been placed under the supervision of the Inspector of Agricultural Banks, I expect that more vigorous steps will be taken to improve the working and the financial condition of these Banks.

Enclosure.

Letter No. 11, dated 10th December 1906, from M. Shama Rao, Esq., M.A., Registrar of Co-operative Societies and Inspector of Agricultural Banks in Mysore, to A. Rangaswami Iyengar, Esq., B.A., B.L., Revenue Commissioner in Mysore.

I have the honor to report on the working of the Agricultural Banks in the State for the year 1905-06, as called for in para 3 of Government Order No. Fl. 2022-32--B. 55-05-2, dated 10th September 1906, which order was forwarded to me with your letter No. 3358, dated 29th September 1906. I could not submit the report before the 1st of October last as the collection of information from the districts took me all this time. This report is entirely based on the information supplied from the districts, which I could not scrutinize in consequence of the urgency of the matter, and further, the statistical statements received from the districts were neither exact nor uniform, and were in almost all cases defective. In some cases the reports were not accompanied by the required statistical statements at all. These statements have therefore been omitted in this report.

2. *Number of Banks.*—The total number of Agricultural Banks working during the year under report was 48, distributed as below:—

1. Kolar District	1
2. Mysore "	7
3. Tumkur "	11
4. Kadur "	...
5. Shimoga "	18
6. Hassan "	...
7. Chitaldrug "	1
8. Bangalore "	10
Total ...	48

3. *Villages sought to be benefited.*—Except in the districts of Kadur and Mysore wherefrom no information was received, the total number of villages sought to be benefited was 493 in 1905-06. In the Bangalore District six new villages were included within the operation of the Banks.

4. *Registered limit of funds.*—The total registered limit of funds of the Banks in the Kolar, Chitaldrug, Tumkur, Shimoga and Bangalore Districts, was Rs. 8,05,385.* The Mysore District Report did not furnish any information on this point.

	Rs
*Kolar	25,000
Chitaldrug	20,000
Tumkur	2,90,000
Shimoga	1,35,385
Bangalore	3,35,000
Total ...	8,05,385

5. *Funds how obtained.*—No additional loan was granted to any of the existing Banks during the year. The business of the Banks was chiefly confined to the amount of loan obtained from Government.

6. *Number of members.*—The total number of members in each of the districts at the close of the year was as follows:—

Kolar...	67
Mysore	401
Tumkur	409

The reductions due to death, removal and resignation were 89 in the districts of Kolar, Mysore, Tumkur, Chitaldrug and Bangalore. In the Shimoga District, there was an addition of six members.

7. *Property of members.*—The total estimated value of the property of the members of the Banks in the several districts is given below:—

District.	Estimated value of the property. Rs.	
Kolar	61,470	
Mysore	7,21,476	Value of lands not given.
Tumkur	3,32,379	
Shimoga	2,18,518	
Chitaldrug	18,070	
Bangalore	9,16,024	
Total ...	22,67,937	

In the Kolar District the Bank* is reported to be maintaining its strength, solvency and credit. Allowing for any exaggeration in valuation, the property may, in the Tumkur District, the Deputy Commissioner states, be regarded as a sufficient security for the Government loan remaining yet unpaid. In the Shimoga District the liabilities are said to be 33 per cent of the assets. In the Chitaldrug District the value of the properties is said to be more than double the amount of the Banks' liabilities.

*Hongenahalli Bank.

8. *Transactions with the Treasury.*—The appended statement shows the receipt and expenditure of the several Banks, as well as their transactions with the Treasury. In Mysore none of the Banks have carried any of the surplus to the Reserve Fund, but have used it up in granting loans to members contrary to the standing orders of Government. In the Tumkur District no amount was drawn from the Treasury during the year, the Banks having availed themselves of the full amount of the sanctioned loans. The Deputy Commissioner considers the amount credited to the Treasury during the year under report towards the reduction of Government loan and towards interest, fair:—

	Amount due.			Amount paid.		
	Rs.	a.	p.	Rs.	a.	p.
Towards Loan... ...	53,485	0	0	45,126	13	4
„ Interest ...	31,241	8	11	30,186	3	0
Total ...	84,726	8	11	75,313	0	4

9. *Deposits.*—The deposits received from all the Banks during the year aggregated Rs. 10,133-13-7 as per statement below:—

	Rs.	a.	p.
Kolar District	1,270	8	2
Mysore „	5,648	11	7
Tumkur „	1,583	6	8
Shimoga „	1,285	0	0
Chitaldrug „	161	3	2
Bangalore „	185	0	0
Total ...	10,133	13	7

In the Mysore District, the Banks at Palahalli, Nanjangud and Kyathanhalli alone seem to have attracted the public. The Deputy Commissioner of the Bangalore District attributes the failure of the Banks to collect deposits to the absence of attraction on account of the low rate of interest allowed, and also to the agricultural depression on account of bad season, plague, etc.

10. *Loans recovered.*—The accompanying table gives an abstract of the outstanding loans, recoveries and balance remaining unpaid by the Banks:—

District	Total to be recovered up to the end of 1905-06			Amount recovered			Amount remaining unrecovered up to the end of 1905-06			Remarks

In all Banks, almost all the members are said to have become defaulters. No punctuality is observed in the recovery of loans, a good many of the office-bearers themselves becoming defaulters.

11. *Object of loans.*—The purposes for which loans have been obtained by members, have been mainly for the discharge of prior debts, for agricultural purposes such as improvements of land, purchase of seed, manure, etc., and also for paying kandayam. In the Kolar District it is stated that the directors supervise the use made of the loans taken by the members.

12. *Income of Banks.*—The main items of income of the Banks are, the interest on loans granted to members, fines and penalties. In the Kolar District the total amount of income under these items amounted to Rs. 858-6-1, while the amount of interest outstanding at the close of the year was Rs. 231-9-0. In the Tumkur District the income is said to have aggregated Rs. 44,622-15-7 including outstandings. The amount recovered in the shape of interest, etc., was, in the Shimoga District. Rs. 7,151-9-0 up to the end of 1905-06. There was a balance of Rs. 6,756 to be recovered. In the Chitaldrug District arrears aggregated Rs. 655-4-3, of which Rs. 88-5-10 was collected during the year, leaving a balance of Rs. 566-14-5. In the Mysore District the total income of the Banks seems to have been Rs. 8,241-3-6. In the Bangalore District the total amount of income including arrears of interest since the formation of the Banks amounted to Rs. 87,406.

13. *Expenditure.*—The total expenditure of all the Banks amounted to Rs. 66,686-2-7, consisting of items such as repayment of interest on Government loan, interest to depositors, establishment charges, contingencies and other miscellaneous charges.

14. *Surplus.*—There was a total surplus in all the Banks to the extent of Rs. 42,852-3-3. The Banks have invariably failed to carry any portion of the surplus to the reserve. In fact, most of the amount that is shown as surplus has not been recovered. And where anything has been recovered, such recovered amount has again been used to grant fresh loans.

15. *Payment of interest on advances made by Government.*—The following table shows the interest due to Government and the interest paid and the balance remaining due from the several districts during the year:—

In the Tumkur District arrears are reported to be large in the case of Nonavinkere. Turuvekere and Manchakalkuppe Banks. In the Shimoga District some of the Banks paid up their instalments in full, *viz.*, those at Tadagani, Siralkoppa, Kolgunasi, Arahada and Genasinakuni. In four Banks the extent of the arrears was over 75 per cent, in four others over 50 per cent, in three over 25 per cent and in two less than 25 per cent. In the Bangalore District, out of ten Banks only five Banks were punctual in repayment of interest to Government.

16. *Repayment of advances made by Government.*—The following statement furnishes information about the amount of loan placed at the disposal of the Banks and the amounts received in payment towards the principal and the interest:—

Certain Banks in the Shimoga District paid in excess of the instalments duee; and these were the Banks at Tadagani, Kolgunasi, Arahada and Gensinakuni. The Bank at Siralkoppa paid the instalments due in full.

17. *Inspection.*—The only Bank at Hongenahalli in the Kolar District was twice inspected in the year. The Assistant Commissioners were the officers that inspected the Banks generally in the several districts. In the Shimoga District an accidental fire occurred at Churchgundi village in the Shikarpur Taluk on the noon of 9th May 1906. The house in which the Churchgundi Agricultural Bank was held, was burnt down, and all the accounts and other papers including security deeds, etc., were destroyed. Steps are being taken to get the accounts prepared from the materials available in the Taluk Office and in the Registration Department. In the Bangalore District only three out of ten Banks were inspected.

18. *Conclusion.*—Having but recently entered upon my duties as Inspector of Agricultural Banks, the information which this report gives is of necessity meagre, on account of the reports from the districts being not up to the standard prescribed. I hope to submit next year a report giving fuller details and based on more accurate lines.

* Of which a loan of Rs 400 was granted to members out of the amount collected from these members in excess

No. FL. 6541-50—B. 11-06-12, DATED BANGALORE, 1ST MARCH 1907.

ORDER THEREON.—The report is not accompanied with the usual statistical statements, and this omission is stated to be due to the defective returns received from the districts. The Government regret the indifference shown by the Deputy Commissioners of districts, and in particular by the Deputy Commissioner of the Mysore District, in obtaining the required information from the Bank authorities and thereby making their reports complete. They trust that future reports will be fuller than the present.

2. There were forty-eight Banks during the year, but it cannot be said that any of them was in a flourishing condition. For some years past, the progress of these Banks has not been quite satisfactory. It is hoped that under the guidance of the Inspector of Agricultural Banks who has been specially appointed to look after them, these institutions will in future be more efficient agencies for the organization of rural credit and relieving agricultural indebtedness.

3. The repayment of the amounts borrowed by the members was very unpunctual, with the result that the Banks were unable to keep their engagements in regard to the refund of the loans obtained by them from the Government. Representations for extensions of time for repayment of loans, have met with considerate treatment at the hands of Government, but it is a matter for regret, that the obstinate defaults on the part of the members, many of whom are office-holders, have made the concessions of little value, impaired the stability of the Banks, and seriously prejudiced their usefulness. The Revenue Commissioner is requested to report what facilities for the realization of their dues may be afforded to the Banks to improve their position in this respect.

4. As observed by the Revenue Commissioner, it is very necessary to revise periodically the estimated value of the property of the members, and the Government approve of the arrangement for an annual appraising of the property by the jamabandi officers.

5. The Revenue Commissioner states that it would be legitimate and profitable to the Banks to use the Reserve Fund, for purposes of making loans to members. In the present condition of the Banks it is necessary that the little surplus which they are able to make, should be invested in a Reserve Fund which should be drawn upon only to meet losses. In the calculation of actual surplus, only the realized amount should be taken into account, and it serves no purpose to take credit for amounts in anticipation of their recovery.

6. The discrepancy of the excess of expenditure over receipts, observed in the case of some of the Banks, requires investigation.

7. Regarding the inspection of the Banks, the attention of the Revenue Commissioner is invited to Government Order No. R. 2558-66, dated 10th December 1901, which should be strictly enforced.

SECTION 4—SALARIES AND ALLOWANCES

Proceedings of the Government of His Highness the Maharaja of Mysore.

No. Fl. 6565-607—S. & A. 115-05-6, dated Bangalore, 2nd March 1907.

Order.—To remove the anomaly and hardship that are being felt by the operation of the rule in regard to the allowances for the first thirty days of a privilege leave vacancy as contained in Article 71 *et sequents* of the Mysore Service Regulations, 3rd Edition, the Government of His Highness the Maharaja of Mysore have resolved to cancel the said rule and to remove the prohibition of or restriction to the grant of the usual acting allowances during the said period.

2. The accompanying Addenda and Corrigenda to the Mysore Service Regulations, 3rd Edition, drafted by the Comptroller, are sanctioned and forwarded to him for the issue of the necessary correction slips at any early date.

Letter No. 5775, dated the 30th November 1906, from the Revenue Commissioner in Mysore, submitting for the orders of Government a copy of letter No. 200, dated the 8th November 1906, from the Deputy Commissioner of the Chitaldrug District, in the matter of the salary allowable to M. S. Hayagriva Rao, acting Deputy Amildar of the Harihar Sub-Taluk, and recommending that a fixed salary of Rs. 100 per mensem, the full pay of the appointment itself, may be granted to all acting Deputy Amildars irrespective of the pay of the incumbents in their substantive appointments, with a view to adequately remunerate the officers for a substantial increase in duty and responsibility.

No. FL. 7023-4—S. & A. 360-06-2, DATED BANGALORE, 20TH MARCH 1907.

ORDER THEREON.—The Government of His Highness the Maharaja agree with the Revenue Commissioner that the minimum pay of an officer holding the responsible position of a Deputy Amildar, whether officiating or substantive, should not be less than Rs. 100 per mensem, and are accordingly pleased to direct that the following rule be inserted as clause (v) under Article 69 of the Mysore Service Regulations:—

"An acting Deputy Amildar ... ... Rs. 100."

SECTION 1—LEGISLATIVE

Proceedings of the Government of His Highness the Maharaja of Mysore.

The following letters from the Deputy Commissioners of districts reporting on the working of the Merchandise Marks Regulation and the rules framed thereunder during the year 1905-06 :—

1. Letter No. 193, dated the 31st August 1906, from the Deputy Commissioner, Kadur, submitting a statement showing the action taken in the Kadur District during the year 1905-06 under Rule XIV of the rules framed under the Merchandise Marks Regulation.

2. Letter No. 1643—96, dated the 3rd September 1906, from the Deputy Commissioner, Kolar, stating that there were no premises in the Kolar District which could be brought under Section 10 of the Regulation and no cases or complaints were reported either under the Regulation or the rules during the year 1905-06 and that piece-goods imported into the district were subjected to examination at taluk head-quarters for levy of octroi duty.

3. Letter No. 239, dated the 6th September 1906, from the Deputy Commissioner, Bangalore, stating that a fair percentage of goods coming under the purview of the Regulation was subjected to examination both in the City and in the taluks and no instance of any breach of the rules was found; and no prosecutions were instituted; that though it is not possible to conduct the necessary examination of piece-goods in the shops satisfactorily, the City Magistrate and the Superintendent of Police have been asked to devote their attention to this part of work also, but that the latter officer has represented his inability to do so and has suggested the appointment of a special officer instead; that he has however issued instructions to all officers to have piece-goods bearing trade description inspected at the time of levy of octroi; and to have the result noted in a separate register, but that this does not seem to be possible in the City of Bangalore on account of the bulk not being broken at the time of levy of octroi; and that no necessity arose for examining yarn.

4. Letter No. 247—S., dated the 13th September 1906, from the Deputy Commissioner, Hassan, stating that Mr Gulam Mohadin Khan, who continued to be the special officer, examined 24 shops in the district and also the Weaving Institute at Hole-Narsipur, and reported to the effect that no breach of the rules had occurred; that the Senior Assistant Commissioner, Mr. Syed Amir Hassan, inspected several shops in his division and reported to the same effect; and that the General Assistant Commissioner, Mr. B. Ramaswamaiya, also inspected two shops in Arsikere and reported that no breach of the rules could be detected.

5. Letter No. 559—369, dated the 29th November 1906, from the Deputy Commissioner, Shimoga, forwarding a statement showing the result of inspection conducted in the various taluks, under the rules, during the year 1905-06.

6. Letter No. 284, dated the 27th December 1906, from the Deputy Commissioner, Chitaldrug, stating that there were no factories in the district which manufactured piece-goods and to which the Regulation could be applied.

7. Letter No. 269, dated the 3rd January 1906, from the Deputy Commissioner, Tumkur, stating that there were no factories in his district during 1905-06, which manufactured piece-goods on a large scale, that piece-goods imported into the district were subjected to octroi duty in the district and taluk head-quarters and that no infringement of the rules was discovered.

8. Letter No. 470, dated the 7th January 1907, from the Deputy Commissioner, Mysore, stating that no infringement of the rules was reported in 1905-06 in regard to imported piece-goods and that there were no weaving factories which come under the operation of Section 10 of the Regulation.

No. J. 2690-97—LEGIS. 25-06-9, DATED BANGALORE, 5TH MARCH 1907.

ORDER THEREON.—Recorded.

2. The report of the Deputy Commissioner of Chitaldrug does not show if any action was taken either by him or by any of his Assistants in the matter of the inspection of imported piece-goods as required by Rule XIV of the Merchandise Marks Rules.

The reports submitted by him and by the Deputy Commissioner of Mysore are vague and give no definite information as to what particular action was taken to ensure that the rules are being observed.

3. The Government are not prepared to accept the proposal of the Superintendent of Police, Bangalore District, concurred in by the Deputy Commissioner of that district, in regard to the appointment of a special officer to conduct inspection of piece-goods imported into the Bangalore City. But the Deputy Commissioner's Assistants in general and the Municipal Vice-President, who is interested in the Octroi revenue, and the City Magistrate may, at frequent intervals of time, make in the City bazaars the random examination prescribed in Rule XIV.

4. In all districts, the experience of purchasers of cotton and woollen fabrics points to the desirability of examinations being made under Rule XIV more frequently than is apparently the case at present.

Letter No. 3639, dated the 12th October 1906, from the Revenue Commissioner in Mysore stating that in anticipation of sanction, he permitted Mr. Sparkes, Deputy Commissioner of the Bangalore District, to attend the High Court at Madras on the 31st October 1906 in obedience to a summons issued by that Court and that it would be desirable if summons on officers of the State from Courts outside the State are served through the Heads of Departments concerned.

No. J. 2878-88—CTS. 120-06-4, DATED BANGALORE, 20TH MARCH 1907.

ORDER THEREON.—Under the late Mysore Chief Commissioner's Notifications Nos. 111 and 112, dated the 23rd July 1878, all criminal and civil processes of whatsoever description, when issued by Magistrates or Courts in British India, are required to be acted upon and executed by all Magistrates and Police officers and by all Courts in Mysore respectively under the same conditions, and in the same manner, as if such processes had been issued by Magistrates or Courts, as the case may be, having jurisdiction in Mysore.

2. In conformity with the provisions of the said Notification No. 112, the Madras High Court has issued a rule of practice under Section 652 of the Civil Procedure Code, directing that a process issued by a Court in the Madras Presidency for service in Mysore should be forwarded direct to the Court exercising local jurisdiction at the place where it is to be served. As the service of process directly on the officer concerned instead of through the Head of his Department is found to be attended with inconvenience, the Chief Court will be requested to be so good as to issue the necessary instructions to all Civil Courts in the State to serve such processes received from the Civil Courts in British India through the Heads of Departments concerned.

3. As regards criminal processes issued by Magistrates in British India under Notification No. 111 for service in the State, the attention of Magistrates and Police officers in Mysore should be drawn to Section 72 (1) of the Criminal Procedure Code, Regulation II of 1904, and they should be instructed to serve these processes through the Heads of the offices concerned.

No. 7391-9—L. B. 84-06-6, DATED BANGALORE, 2ND MARCH 1907.

ORDER THEREON.—In Government Proceedings No. 8368-85—L. B. 126-03, dated the 12th February 1906, the Presidents of all the District Boards were requested to submit reports as to the action taken by them in setting apart places for storing manure in villages into which the Village Sanitation Rules had been introduced. Accordingly the President of the District Board, Tumkur, has submitted a statement which shows that, out of 439 of such villages, places have been selected for the purpose in 419 villages and that, in the remaining 20 villages manure is being stored by the raiyats in their own fields, which are reported to be suitable places in themselves. It is further stated that occupied lands have been selected wherever there were no Government lands for the purpose.

The work done so far is satisfactory. It is hoped that the local authorities will be made fully alive to the necessity of seeing to the storage of manure being confined to places specially set apart for the purpose.

(3) Docket No. 968—693, dated the 30th April 1906, from the President of the District Board, Shimoga, submitting with reference to this office docket No. 10816—L. B. 275-05, dated the 20th April 1906, a sample copy of the patel's register (containing certain recorded notes of inspection) prescribed under Government Proceedings No. Rev. 3371-411, dated the 4th February 1902.

No. 7626-36—L. B. 275-05-13, DATED BANGALORE, THE 6TH MARCH 1907.

ORDER THEREON.—It is observed that in the absence of any special agency, the patel of the village, and in the case of an alienated village, the holder thereof, has been, under clause 3 of Section II of the rules framed under the Village Sanitation Regulation, declared to be the sanitary agency primarily responsible for the due observance and enforcement of the sanitation rules. To check and scrutinize the work of patels in this respect the Government in their Proceedings No. R. 3371-411, dated the 4th February 1902, directed the maintenance by them of a register wherein inspecting officers may record any instructions they may have to give or any remarks they may have to make respecting village sanitation, water-supply, etc. But this register does not appear to have been properly maintained everywhere. With a view to induce patels to exert themselves in this direction, the President of the Bangalore District Board proposed the institution of three prizes of Rs. 7, 5 and 3, respectively, in each taluk, to be awarded every year to such of the patels recommended by Amildars as kept their villages clean and tidy, and the Presidents of the other District Boards and the Sanitary Commissioner having been consulted in the matter,

the Presidents of the District Boards of Chitaldrug, Tumkur, Mysore, Hassan and Kadur, say that they are not in favor of the proposal, while those of the Kolar and the Shimoga District Boards and the Sanitary Commissioner are of opinion that this measure would materially advance the interests of sanitation. The President of the District Board of Shimoga, however, proposes the introduction of the scheme in the Shimoga Taluk alone as a tentative measure.

On a careful consideration of all the circumstances, Government are of opinion that the award of prizes as proposed is calculated to have a very beneficial effect in creating a spirit of emulation among the patels and thereby securing better attention to the sanitary condition of the villages, and are accordingly pleased to sanction the scheme tentatively for one year with effect from 1st July 1907, the entries in the register prescribed by Government Order of the 4th February 1902, being made the basis for the award of prizes.

The value of the prizes now fixed being Rs. 7, 5 and 3, respectively, for each taluk or sub-taluk, the total cost of the scheme would amount to Rs. 1,155 as shown in the margin, which should be provided for by the Presidents in the District Fund budgets for 1907-08 and the result of the scheme reported at the end of the year.

2. It is observed that no arrears are shown as outstanding in the Mysore District either at the beginning or at the end of the year. The President is requested to state whether this is really so and whether there are no arrears outstanding under any of the items of District Fund revenue, such as 76 per cent of local cess, etc.

3. The balance to be recovered at the end of the year is objectionably large in the Districts of Shimoga, Kadur, Kolar and Tumkur.

4. The actual receipts for the year as shown in the Comptroller's account differ considerably from those shown under collection in the demand, collection and balance statements for the year as shown below :—

District	Receipt as per Comptroller's accounts for 1905-06	Collection as per demand, collection and balance statements for 1905 06	Difference
	Rs	Rs	Rs.
Bangalore	75,364	10,554	— 64,810
Kolar	77,840	10,309	— 67,521
Tumkur	87,894	11,773	— 76,121
Mysore	1,39,300	39,759	— 99,541

Kadur	53,627	13,792	— 39,835
Chitaldrug	60,026	21,476	— 38,550

The collection shown in the returns from the Hassan District Board is only Rs. 816 less than the actual realizations as shown in the Comptroller's accounts, while in the other districts the differences are large. Probably the former includes credits under 76 per cent of one anna cess, which is the main item of revenue under the head "credited to the District Treasury," while the same is excluded from the returns of the District Boards other than Hassan.

The Presidents are therefore requested to see that the future demand, collection and balance statements are made to show the demand, collection and balance under all items of the District Fund revenue, in view to giving a correct idea of the receipts, so that the figures shown under "Collection" may correspond with the realizations shown in the Comptroller's accounts.

No. 8030-7—L. B. 289-06-2, DATED BANGALORE, 12TH MARCH 1907.

ORDER THEREON.—The number of works in the Tumkur District for which Government sanction was obtained during the past three years was so low that no inconvenience of any kind could have been felt by the President in addressing Government.

2. The existing rules must continue until 'Local Boards and Local Self-Government' develope further and become more firmly established than they are now.

3. Any delay in connection with the works of more than Rs. 500 caused by correspondence with Government can be obviated by Presidents having a number of projects ready with estimates prepared in time before they are selected and entered in budgets. This would avert the great loss of time now very often entailed by the work of preparing estimates being started only after a budget is sanctioned by Government.

Letter No. 8312, dated the 1st February 1907, from the Revenue Commissioner in Mysore, forwarding with reference to para 4 of Government Order No. 5323-4—L. F. 280-06-2, dated the 19th December 1906, the following letter No. 468, dated the 6th January 1907, from the Deputy Commissioner, Bangalore District, *re* the cattle show held in connection with the jatra of the Ghate Subramanyaswami temple in the Dodballapur Taluk; and stating that on the whole the cattle show was a success, considering the very short time at the disposal of the Deputy Commissioner:—

Letter R. C. No. 468, dated Bangalore 6—9th January 1907, from H. H. Sparkes, Esq., Deputy Commissioner, Bangalore District, to A. Rangaswami Iyengar, Esq., B.A., B.L., *Revenue Commissioner in Mysore.*

I have the honor to enclose copy of the report received from the Assistant Commissioner, Dodballapur Sub-Division, regarding the cattle exhibition held at the Subramanya jatra. The sanction of Government to expend Rs. 200 of the temple money on prizes was received very late in the day and nothing could be done in the shape of advertising. The only thing, therefore, that could be done was to get together the best cattle available on the place and award them prizes, and which the Assistant Commissioner has done very satisfactorily. I personally visited the fair on the 26th and went through the whole of it including the show ring. As observed by the Assistant Commissioner in his report, a great deal of diffidence was shown by the raiyats to bring forward their bullocks as they were unable to understand the object with which prizes were given away gratis, and had their suspicion about it more especially as the representative of the Dutch Government was then buying bullocks; they have now, however, been assured of the true object to be gained and have not the slightest doubt that with duly advertising a vast improvement will be shown next year.

2. I was immensely struck with the whole scene. It has been estimated that some 30,000 cattle were brought and about 100,000 people must have been present. I made many enquiries and found people came from long distances to attend this fair, and I have never seen people apparently so happy and contented. One and all seemed to be enjoying themselves and in the most primitive ways. The one outcry is the want of water and if this can be overcome, it will be conferring an immense boon upon the really deserving raiyat. As I was unable to see the place properly on the 26th December 1906, on account of the crowd, I paid another visit to-day accompanied by the Assistant Commissioner, Amildar, temple Dharmadarsis and other leading raiyats, to enquire into the actual wants. As I have said above, the main grievance is want of water, and this I think can be met by damming up one of the deep ravines at the upper camp, the fair being divided into two camps, the upper or main camp some distance above the temple and to which all the people from the Bangalore side resort, and the lower camp to which the people from Goribidnur and Tumkur resort. I propose to deal with the main camp first; water can be stored for this by damming one of the deep nullahs just behind it and if found necessary sinking wells just below the bund for drinking purposes. As the water in the katte is likely to become foul during the jatra, I would propose that it be provided with a sluice to enable its being emptied after the jatra and thoroughly dried in the sun and then re-filled by the next rains. This will cost a good deal of money, and I think that Public Works Department should be asked to construct it, and I would further suggest that the requisite funds should be met by the temple.

3. The next thing to be considered is the improvement of the road. This can be greatly improved by the building of a three-vent tunnel and making a certain cutting which was pointed out to the Assistant Engineer. This will cost some Rs. 2,000 and may be met from the District Funds.

4. The next thing to be considered was the choosing of a suitable site for a show-yard and for this a spot was pitched upon which lends itself admirably for the purpose, being about the centre of the main camp and which the holders of the land are willing to give free for the purpose provided that they are allowed to take the cattle-droppings free. The arrangements for the show I would propose to leave to a Committee to consist of persons living in the near neighbourhood and most interested in the proceedings. If Government consider that this fair should be continued, I would request to kindly obtain orders as early as possible to allow of full preparations being made such as the forming of a Committee to frame rules and the issue of programmes to allow of the raiyats preparing themselves for the next year's show.

ENCLOSURE.

Letter No. 736 of 3rd—4th January 1907, from the Sub-Division Officer, Dodballapur, to the Deputy Commissioner, Bangalore District.

With reference to your No. 2,200, dated 21st December 1906, forwarding for information and guidance copy of Government Proceedings No. 5323-4—L. F. 280-86-2, dated 19th December 1906 *in re* the holding of a cattle show in connection with the Shasti jatra at the Subramanya Ghat temple in the Dodballapur Taluk, I have the honor to state that on receipt of

the Government Order, I proceeded to the temple and made necessary arrangement for holding the show. As the cattle fair assembled on the 24th ultimo and as the Government Order was received by me only on the 21st instant, there was not sufficient time to publish the Government Order in the different taluks of the district before the commencement of the jatra. Wide publicity was, however, given to the show and to the distribution of prizes sanctioned by Government, by beat of tom-tom on the 25th ultimo (among the persons that had assembled for the cattle fair; and all the taluk officials and the leading patels and others were also deputed to inform all cattle' owners at the jatra of the show. By the morning of the 26th ultimo about 100 pairs of bullocks which formed the pick out of the large collection of about 30,000 bullocks which had come in for the fair, were collected in a roped enclosure, and a committee of local experts consisting of half a dozen patels and others who had a good practical knowledge of cattle was selected by the Amildar to help us in adjudicating on the merits of the cattle competing at the show. The Deputy Commissioner who arrived at the Ghate on the day was very much pleased with the collection. The judging and the examination of the cattle had, however, to be put off to the following day as it was rather late when the collection of the bulls was completed and as some more good bulls were expected to be added to the collection. But unfortunately the weather began to get cloudy and rainy on the 27th morning and in consequence the collection of the cattle on the morning of this date turned out not so satisfactory with regard to numbers as on the previous day. As most of the owners of the cattle expressed a desire to get back to their villages at once owing to the rain and the want of accommodation at the place, the work of examination and judging of the bullocks was taken up at once. The whole collection consisted almost entirely of pairs of cart bulls. There were two or three breeding bulls but no cows or buffaloes. As the number of breeding bulls was too small to admit of any examination and comparison, they were excluded from competition. The remaining bulls were divided into two classes—Hallikar bulls and Bettadadana (hill-side cattle) and four prizes of Rs. 25, 20, 15 and 10 were, as per personal instructions of the Deputy Commissioner announced to be given for each of the above class of bulls. There were about 25 pairs of each class, which, as I have already said, formed the best out of those that attended the fair. The judging for prizes was effected by separately taking the opinion of each of the expert judges and their deciding in favor of the pair which got the largest number of votes.

2. In addition to the eight pairs of bulls so selected (four pairs of Hallikar and four pairs of Bettadadana) as entitled to prizes, a special prize of Rs. 10 was awarded to a pair of Nellur bulls belonging to Agaram Rama Reddi of Bangalore Taluk. It would appear that these bulls were purchased by the owner as calves about two years ago from some officer in the Civil and Military Station, Bangalore, and that they are now priced at Rs. 500. It may be noted here that the best pair of Hallikar bulls and Bettadadana were also priced at Rs. 500 and that the former was sold for the above price by the owner at the jatra to one Nanjappa. The other pairs which got the other prizes were also very good specimens valued at prices ranging from Rs. 500 to 350. It was in fact no easy task to select from among the splendid collection that we had and a good deal of judgment and discretion had to be exercised in the selection of the prize pairs.

3. The value of the prizes awarded amounted to only Rs. 150 as detailed above as against Rs. 200 sanctioned by Government. No incidental expenses of any sort were incurred in connection with the show as it had to be got up in haste and there was no time to make any pakka arrangements involving any expense.

4. When the best bulls at the fair were collected on the 26th instant by beat of tom-tom and by the agency of the Revenue officials and others, a mischievous rumour seems to have been got up by somebody that Government were making the collection with the intention of seizing the bulls for their use or of making some profit out of them. As the recovery of any competition fee would have only confirmed the raiyats in their vague fears, I considered it advisable to withhold the recovery of any fees for the bulls competing for the show, the more so as the best bulls were collected more by the agency of the Revenue staff than brought in voluntarily by the owners. To allay the above fear of the people and to fully convince them that the Government were organising the show only in the best interests of the raiyats themselves, I deemed it best to distribute the prize money to them without delay and accordingly issued certificates and distributed the prizes to the winners on the spot and also explained to them the object of the Government in organising the show and awarding prizes; and it was only after they got money and the certificates in their hands that most of them appeared to be convinced of the beneficent intention of Government.

5. I append herewith a statement showing the names and descriptions of the prize-winners.

6. Though at present only bulls are brought to the jatra it is possible to attract all varieties of cattle-breeding bulls, cows, buffaloes, etc., to the show if only it becomes an established and permanent institution. I have had it publicly announced to the persons who attended the fair that prizes will be awarded for breeding bulls, cows and other varieties of cattle next

year and I believe that if only the next show is announced and published in all the districts at a sufficiently early date, then will there be a very good and successful collection of all classes of cattle. In case of the show being sanctioned annually it will be necessary to select a convenient place wherein the cattle competing for the show can be enclosed and to provide water facilities in the shape of wells and water troughs. Separate proposals will be submitted on this point on receipt of orders in the matter.

7. It is a matter for regret that Mr. Narsimiengar (Inspector of Cattle Diseases) who was to have been with me at the show was at the last moment prevented from joining me owing to his having been disabled by a bad carriage accident that he had on the 24th ultimo. Mr. D. Venkataramaiya, Advocate, Bangalore, was present with me during the show and my thanks are due to him for the great help he rendered me in examining and judging the cattle which competed for prizes.

ORDER THEREON—Recorded with the observation that while in the body of the Assistant Commissioner's report the value of the prizes awarded is stated to be Rs. 150, the statement appended to it gives details for only Rs. 140.

The Deputy Commissioner is requested to place before the District Board his proposal to improve the road and to form a local committee for conducting the show, and to submit their resolution with his opinion thereon for the orders of Government.

2. All preliminaries should be settled and notified in the Government Gazette and in the Revenue and Agricultural Gazette fully six months before the date fixed for the next show. The list of prizes awarded at the last show should be thus published also.

3. The question of providing out of the temple funds water facilities for men and cattle assembling at the jatra will be referred to the Muzrai Department.

4. It is desirable for several reasons that photos of the cattle which win prizes at these shows should be taken for record and publication. In this view the Inspector-

General of Police is requested to arrange with the President of the several District Boards to send to each jatra, of which due intimation will be given by the Presidents, one or two subordinates of the Police Department to take these photos.

Letter No. 169, dated the 27th November 1906, from the Comptroller in Mysore, requesting sanction for the payments of 20 bills aggregating Rs. 124-9-6, being the amount of travelling allowance due to Local Board Members, etc., as they were in arrears for more than two years and stating that the Presidents explain the delay in their submission as being due to non-receipt in time of information from the Local Board Members, who were ignorant of the rules.

* 5 bills of Shimoga District
15 bills of Bangalore District.

No. 8068-76—L. B. 253-06-2, DATED BANGALORE, 12TH MARCH 1907.

ORDER THEREON.—The bills received with the above are sanctioned as a special case and returned to the Comptroller for audit.

2. The Presidents and Members of District Boards should clearly understand that excuses of the kind aforesaid for non-submission of travelling allowance claims soon after they have accrued are inadmissible.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

The marginally noted communications from the President of the District Board of Tumkur suggesting that the opinion of the Amildar who is always the President or Vice-President of the Taluk Board, backed, if necessary, by that of the Hospital Assistant or the Public Works Department officer of the taluk, may be accepted in connection with the village extensions and the eligibility of the sites selected therefor with reference to sanitary requirements.

Docket Nos. 96, 97, 98, 99, and 100, dated 12th December 1906.

No. 8144-52— L. B. 124-06-4, DATED BANGALORE, 12TH MARCH 1907.

ORDER THEREON.—The acquisition of the lands referred to is sanctioned and the respective declaration statements are forwarded to the Compiler of the *Mysore Gazette*, for publication.

2. The Revenue Commissioner is requested to take steps for striking off the proportionate assessment on the lands acquired and the President will see that the allotment of sites and the laying out of roads in the extensions are carried out with due regard to sanitary requirements.

3. It would be sufficient if in such cases the proposed sites are inspected and approved of by the Amildar or the Deputy Amildar concerned and the District Medical Officer, and the Local Board members consider the reports of the Amildar or the Deputy Amildar and the District Medical Officer and record a resolution thereon, formally accepting their selection.

No. 8308-15—L. B. 298-06-22, DATED BANGALORE, 16TH MARCH 1907.

ORDER THEREON.—Government consider that all villages comprising more than 300 houses or 1,000 inhabitants may be constituted village unions and that the proposal of the Shimoga District Board to constitute into unions road-side villages irrespective of the limit of number of houses or population should be reserved for future consideration. They accordingly sanction, with effect from 1st July 1907, the formation of unions in such villages included in the lists received with the above as come up to the standard above mentioned. The needful notification will be published in the Gazette. The Presidents of the District Boards of Bangalore and Kadur, who have not submitted their proposals for the formation of unions, are now requested to submit lists of villages containing the prescribed number of houses or population, the Presidents of other District Boards forwarding supplemental lists of such villages, if any, in view to their being constituted into village unions.

2. Government are also pleased to sanction the introduction into the village unions now formed of a tax on houses including shops at the rates prescribed by Government in their Order No. 3878-85—L. F. 109-03, dated 8th April 1904, and to direct that the realizations therefrom be credited to the funds of the respective unions with effect from 1st July 1907, from which date the revenue from the taxes on oil mills and carts alone in these villages will be credited to Provincial Funds as here-

tofore. As the revenue from house tax in the unions now formed cannot be expected to be included in the District Fund budgets for 1907-08 due in the Secretariat on 1st March 1907, the Presidents are requested to submit, so as to reach the Secretariat on or before the 1st April 1907, statements showing the estimated income from this and other miscellaneous items of revenue and expenditure required on account of establishments, etc., for each union

3. The proposals for the appointment of members have been received only in the case of a few unions, but as, owing to the time that has elapsed, they may now require revision either on account of the change of residence of the members or other cause, the Presidents of the several District Boards are requested to submit at an early date complete lists of members in the accompanying form for each of the unions.

SECTION 2—MUNICIPAL

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No. 324, dated the 5th November 1906, from the Deputy Commissioner and President of the Municipal and District Boards, Mysore District, reporting that Mr. R. C. Sherwood, Supervisor of No. 4 Sub-Division and *ex-officio* member of the Hunsur Municipal and Taluk Boards, absented himself from the meetings held by the former in the months of January to May 1906, both inclusive, and in July 1906, and by the latter in the months of August and October 1906; and that from the Supervisor's explanation it is clear that he considers that his attendance at the meetings of the Municipal and Taluk Boards is not a part of his legitimate duty and that he also wishes to be given the option of attending the meetings.

No. 7675-83—ML. 211-06-2, DATED BANGALORE, 6TH MARCH 1907.

ORDER THEREON.—In Government Proceedings No. 11576-84—L. F. 81-92, dated the 11th January 1893, it is clearly laid down that attendance at meetings of Municipal Boards is part of the official duties of officers appointed as *ex-officio* members thereof. Government Proceedings No. 759-68—L. F. 153-92, dated the 15th July 1895, lays down that whenever officers of the Public Works Department, who are members of these Boards, are prevented from attending the meetings owing to the urgency of Departmental work, they should forward an explanation of the cause of their absence to the Municipal Board concerned. Under these circumstances, Government regret that the Supervisor should have absented himself from five consecutive meetings of the Hunsur Municipal Board. The Chief Engineer will be good enough to communicate this to the officer concerned.

2. The Deputy Commissioner is requested to direct the Vice-Presidents of Municipal and Taluk Boards to give at least two weeks' notice to the Public Works Department officers who are *ex-officio* members of these Boards, whenever any important business at which their presence is specially necessary or desired is to be transacted.

3. The observation contained in para 1 *supra* applies to the *ex-officio* members of Taluk Boards also.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Deputy Commissioner and President of Municipal and District Boards, Mysore District.
The Chief Engineer in Mysore.
The Presidents of Municipal and District Boards of other Districts.

Letter No. 7821, dated the 21st November 1906, from the Chief Engineer of Mysore, representing that any Municipal Council should be able, after obtaining the consent of the Chief Engineer, to request the presence of the Sanitary Engineer at any meeting of the Council and suggesting, therefore, that the Sanitary Engineer be included in the list of officers mentioned in Section 26 (14) (*a*) of the Mysore Municipal Regulation, VII of 1906.

No. 7693-704—ML. 240-06-2, DATED BANGALORE, 6TH MARCH 1907.

ORDER THEREON.—Recorded with the remark that the Government have no doubt that Municipal Boards would gladly welcome the presence of the Sanitary Engineer at their meetings, and that therefore they consider that for the present

at all events no formal amendment of the Regulation with a view to the inclusion of the Sanitary Engineer in the list of officers specified in Section 26, clause 14 (*a*), is necessary.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Chief Engineer of Mysore.
The Presidents of the Bangalore and Mysore City Municipal Councils.
The Deputy Commissioners and Presidents of other Municipalities.

Letter No. 740—122, dated the 6th February 1907, from the President of the Municipalities in the Shimoga District, submitting a statement of meetings held in the several Municipalities of the District during the month of December 1906.

No. 8120-7—ML. 387-06-5, DATED BANGALORE, 12TH MARCH 1907.

ORDER THEREON.—Recorded. The reason adduced for no meeting of the Shimoga Municipal Board being held in December (*viz.*, absence of the President and Vice-President from head-quarters on jamabandi and inspection duty) is manifestly nadequate and unacceptable.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The President of the Municipalities, Shimoga District.
Copy to the Presidents of other Municipal Boards.

No. 8261-70—ML. 575-05-12, DATED BANGALORE, 12TH MARCH 1907.

ORDER.—Government have noticed that no definite system is at present followed by the several Municipal Boards in the State in the matter of the preparation of estimates for Municipal works and their execution. Schedules of rates are, if at all, very rarely maintained, and where such schedule is maintained, no arrangement is made for its periodical scrutiny. With a view to remedy this defect, and ensure uniformity of practice in all Municipal towns, Government are pleased to issue the following instructions which can also be duly incorporated in the Rules to be prepared under the Mysore Municipal Regulation, VII of 1906:—

(*a*) A schedule of rates for each kind of work (commonly executed) should be prepared and carefully scrutinised by a select committee of competent members on the Board and then discussed by the Board at one of its meetings with due notice thereof and finally approved with such modifications as they may deem necessary, a copy of the schedule thus finally passed by the Board being submitted to Government for information without loss of time. The standing schedule may be taken into consideration at every first meeting of the Municipal Board held in the official year.

(*b*) Estimates for works to be executed should be framed in strict accordance with the standing schedule of rates and alteration in the rate for any particular item should, if necessary, be considered by the Board and allowed only in exceptional cases with reasons for the same duly recorded.

2. As regards the actual execution of the work, the President should try to introduce an element of competition by which the rates may be beaten down as low as possible, and should adopt with necessary modification the course now being pursued in this respect by the Department of Public Works.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Presidents of the several Municipal Boards in the State, including the City Municipal Councils of Bangalore and Mysore.

2. The Bangalore City Municipality continued to be under the executive charge of a whole-time President till the end of the year, when the former system of the Deputy Commissioner of the Bangalore District being the *ex-officio* President was revived. The general elections held in the Bangalore City were not completed before the close of the year, while in the Mysore City such elections were held and ten gentlemen were elected as Municipal Commissioners.

3. Monthly meetings were regularly held in all Municipalities, except the 14 whose names with the number of meetings held in each case are noted in the margin. In these latter the defect was chiefly due to want of a quorum.

Receipts.—The largest revenue was, as usual, contributed by the Bangalore and Mysore City Municipalities, while in the remaining Municipalities, the revenue ranged between Rs. 28,625 in Chikmagalur and Rs. 587 in the Bagepalli Municipality of the Kolar District.

5. *Incidence of taxation.*—The revenue from taxation, including Octroi and tolls, was Rs. 2,15,862 in the Bangalore City, Rs. 1,34,160 in the Mysore City and Rs. 3,11,488 in all the other Municipalities of the State. The incidence of taxation per head of population was Rs. 3-1-9 in the Bangalore City, Rs. 1-15-6 in the Mysore City and Re. 0-13-4 in other towns, as against Rs. 2-11-0, Rs. 2-1-0 and Re. 0-12-6, respectively, in the previous year.

6. *Octroi.*—The subjoined statement gives the details of Octroi revenue as compared with those of the previous year :—

During the year Octroi was newly introduced into the Municipalities of Kunigal, Koratagere, Pavagada, Turuvekere, French Rocks, Bannur and Mandya and was extended to jaggory in Yedatore and to ghee and sheep and goats in Hunsur. It was ordered to be suspended on all articles in the Melkote Municipality from

1st September 1905 and to be abolished on jaggory and sugar in the Chikballapur Municipality. The decrease in the income from this source in Magadi is stated to be due to smuggling, which, it is hoped, the President will take steps to prevent.

7. *Loans.*—Loans amounting to Rs. 15,000 were sanctioned from Provincial Funds, of which Rs. 2,000 were for the construction of a compound wall to the weekly market place at Kolar, Rs. 3,000 for the acquisition of lands for the extension of the town of Tyamagondlu and the remaining Rs. 10,000 for the imporvement of the sanitation of Tumkur.

8. *Tolls.*—Fees were levied on carts entering the Sante (market place) at Arsikere, and toll-gates for the levy of tolls were established on the roads leading into the town of Nanjangud.

9. *Contribution and Grant-in-aid.*—For the special repairs of roads during the visit of their Royal Highnesses the Prince and Princess of Wales, the Mysore City Municipality received a contribution of Rs. 12,000 from Provincial Funds and the Bangalore City Municipality received a similar contribution of Rs. 5,000. The Municipality of Hassan received a grant-in-aid of Rs. 3,000 from the Plague Funds for sanitary improvements.

10. *Demand, Collection and Balance.*—The following abstract statement shows the demand, collection and balance of Municipal revenue during the year :—

The arrears in the Bangalore and Mysore Cities and in the Mysore, Kadur and Shimoga Districts are excessive and objectionable.

EXPENDITURE.

11. *Lighting.*—The expenditure under this head amounted to Rs. 56,505 against Rs. 53,588 in the previous year. Electric lights were introduced into the Bangalore City in August 1905, and the contribution payable by the Municipality on this account was fixed at Rs. 15,000 per annum.

12. *Public works.*—The appended statement exhibits the expenditure incurred on public works and on the establishments employed for their supervision :—

Total ...	1,96,160	2,45,711

The increase was chiefly under repairs of "Roads," "Drains," "Water-supply," "Other works," as well as under "Compensation" and also on works carried out by the Public Works Department. The large expenditure on the repairs of roads in the Bangalore and Mysore Cities and the payment of compensation for lands and houses acquired for the extension and improvement of the Tumkur, Tyamagondlu and Mysore towns as also the construction of drains in Bangalore and some of the minor Municipalities, contributed to this increase.

13. *Conservancy and Sanitation.*—Exclusive of the cost of drains, water supply and other sanitary works shown under "Public Works," and of works executed out of Provincial Funds, the Municipal Boards spent in all Rs. 1,74,140 under this head against Rs. 1,72,142 in the previous year. This is exclusive of the cost of establishment maintained by the Mysore City Trust Board for the conservancy of the Nazarbad, Mandi and Lashkar Mohallas, which remained unadjusted in the accounts of the Comptroller at the close of the year. The City Municipalities of Bangalore and Mysore were administered under the Municipal Regulations of 1871, and Regulation III of 1888. The Rules under the Village Sanitation Regulation were in force in all the other and non-regulation Municipalities. In these latter, 169 cases involving 168 persons were prosecuted with the result that 94 persons were convicted and fines amounting to about Rs. 187 were credited to Municipal Funds. In the Bangalore and Mysore Cities there were 57 such cases involving 60 persons against 32 cases involving 34 persons in the previous year. Forty persons were convicted and fines amounting to about Rs. 131 were levied and credited to Municipal Funds.

14. *Vital Statistics.*—The number of births and deaths registered in the several Municipalities during the year was 10,874 and 12,210 respectively, against 8,765 and 18,714 in the previous year as shown in the following statement:—

Municipal Districts	Births		Deaths

Total ...	8,765	10,874	18,714	12,210

The births have increased and the deaths have decreased all round.

15. *Charitable grants.*—Inclusive of the Bangalore City Maternity Hospital and Her Highness the Maharani's Hospital, Mysore, there were 67 Local Fund Dispensaries, subsidised from the Municipal Funds. The statistics relating to the Bangalore City Maternity Hospital should have been included in Appendix No. XVII of the report and those relating to Dispensaries receiving no contribution from Municipal Funds omitted from the appendices of the Tumkur and Hassan District reports. The details showing the number of patients treated and the cost incurred are shown in the subjoined statement:—

In addition to the institutions above mentioned, the Municipal Funds maintained in part the Indigenous Hospital at Mysore and the Hindu Vaidyasalas at Tarikere, Birur and Chikmagalur, besides making grants-in-aid to one Hindu and two Unani Dispensaries in the Mysore City and a Hindu Vaidyasala at Chitaldrug. Also St. Martha's Hospital at Bangalore continued to receive its Municipal grant-in-aid. It is observed that statistics relating to St. Martha's Hospital at

Bangalore and the grant-in-aid Vaidyasala at Chitaldrug have not been incorporated in Appendix No. XVII of the respective reports. This is an omission requiring correction.

16. *Midwives.*—The Bangalore City Municipality maintained the Maternity at Bangalore, while the Mysore City Municipality bore two-thirds of the cost of Her Highness the Maharani's Hospital at Mysore. Besides these, the Municipal Funds contributed towards the pay and allowances of 57 midwives. The number of cases attended to during the year was 4,614 as shown in the subjoined statement, exclusive of those conducted in the Bangalore City Maternity, the statistics relating to which have not been incorporated in Appendix No. XVIII of the Bangalore City report. This again is another omission requiring correction.

* The number of midwives was ten in 1904-05, for whom no contribution was paid from Municipal Funds. This year the number actually subsidised from Municipal Funds has been shown. The remaining midwives in the district are paid entirely from Municipal Funds.

17. *Vaccination.*—The following statement shows the number of persons vaccinated during the year, as compared with the figures of the previous year :—

Municipal Districts	Number of persons vaccinated in 1905-06			Number of persons vaccinated in 1904-05

The decrease in the number of operations was chiefly due to the large number of persons vaccinated in the Mysore City during the previous year on account of the prevalence of small-pox in the City.

18. *Miscellaneous.*—The details of expenditure under this head are shown in the following abstract statement:—

Items	Expenditure for 1904-05	Expenditure for 1905-06

19. *Repayment of loans.*—A sum of Rs. 11,749 was paid out of Municipal Funds towards the repayment of loan and interest on debt as shown in the following statement:—

The payment of instalments by the Chitaldrug and Sringeri Municipalities was ordered to be postponed, while the non-recovery from the Kadur Municipality was due to overpayments during the previous years, the instalments by the Dodballapur, Tyamagondlu and Tumkur Municipalities not falling due during the year. The balance of Rs. 30,232 payable towards the repayment of loan granted for the water-supply project of Kolar was ordered to be written off the accounts and the sum of Rs. 1,166 payable by the Mysore and Nanjangud Municipalities has since been adjusted in the Comptroller's accounts. The balance of principal and interest outstanding against the Municipalities at the end of the year was Rs. 85,667 and Rs. 2,092 respectively, in accordance with the preliminary statement furnished by the Comptroller. This does not include the balance payable by the Chikmagalur Municipality for the water-supply project, for which a loan was granted from the Local Funds

General. The Comptroller is requested to see that all the loans payable by Municipalities from whatever funds they may have been sanctioned, are exhibited in his future statements.

20. *General.*—The reports of the Bangalore and Mysore Cities do not contain information regarding suits filed by or against the Municipalities excepting those referred to in Appendix No. XV, though the omission was noticed in the reports of the two previous years. The Presidents are requested to account for this.

21. Municipal administration has, on the whole, been good, and is expected to improve in efficiency with the advent of the new Regulation just promulgated as Regulation No. VII of 1906.

No. 8640-9—Ml. 122-06-79, DATED BANGALORE, THE 21ST MARCH 1907.

ORDER THEREON.—The total demand, including the arrears of previous years, amounted to Rs. 3,18,432, of which Rs. 1,45,322 were collected or remitted, leaving a balance of Rs. 1,73,110 or 54 per cent of the total demand uncollected at the end of the quarter as shewn in the following abstract statement:—

	Total	3,18,432	1,45,322	1,73,110	54

The proportions given in the last column of the above statement in all cases except Chitaldrug District are manifestly unsatisfactory in varying degrees, the worst being that for the Mysore District closely followed by those relating to the Hassan, Kadur and Shimoga Districts. This is the more particularly regrettable as the khists for the current year 1906-07 would be accruing almost immediately.

Letter No. 5912, dated the 5th December 1906, from the Revenue Commissioner in Mysore, submitting with reference to Government Proceedings No. 7046-8—Ed. 47-05-4, dated the 12th January 1906, copies of communications from the Deputy Commissioners of the Bangalore, Kolar, Tumkur and Mysore Districts reporting on the work of the Sericultural Inspectors, with his own suggestions for the improvement of the Silk Industry in the State :—

Letter No. 5912, dated 5—8th December 1906, from the Revenue Commissioner in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments.

With reference to Government Order No. 7046-8—Ed. 47-05-4, dated 12th January 1906, extending the term of the Sericultural Inspectors to two years and calling for a report at the end of each year, I have the honor to submit herewith copies of letters received from the Deputy Commissioners of the Districts of Bangalore, Kolar, Tumkur and Mysore as per list noted below, reporting on the work of these Inspectors :—

	No.	*Date*	*From whom*	
1.	964	16th June 1906	Deputy Commissioner, Mysore, with one enclosure.	
2.	229	23rd October 1906	do	do
3.	1868-82	8th September 1906	do	Kolar.
4.	218	12th September 1906	do	Bangalore.
5.	222	8th October 1906	do	Tumkur.

2. The gist of the above communications may be briefly summed up thus :—

(*a*) The Deputy Commissioners of Kolar and Tumkur testify strongly to the good work done by the Inspectors.

(*b*) the Deputy Commissioner of Kolar recommends the distribution of copies of Mukerjee's Hand-book of Sericulture to Assistant Commissioners.

(*c*) Mr. K. Sreenivasa Rao, Assistant Commissioner (then in charge of the French Rocks Sub-Division) suggests the advisability of—

inviting Mr. Odzu to visit some of the silk-rearing centres for pointing out to the villagers through the Amildars the defects of the existing methods,

sending intelligent silk-worm rearers periodically to Tata's Farm at Bangalore at the cost of Government and of reverting the Inspectors to their original places in the Educational Department.

(*d*) Mr. Sparkes, as Deputy Commissioner of Mysore, considers the work of the Inspectors " as more or less of a farce."

(*e*) Mr. Kantaraj Urs, the present Deputy Commissioner of Mysore, promises to make a report on the subject after completing the jamabandi of the Mandya Taluk, to which an Inspector is attached.

(*f*) Mr. Sparkes, as Deputy Commissioner of Bangalore, thinks that the Inspectors may be better employed by being attached to the Industrial School at Channapatna for instructing the boys in improved methods and in raising seeds from healthy moths for sale to the villagers.

3. Before dealing with the above recommendations, I may state that during my last tour of inspection in the Kolar District, I found that all the three Sericultural Inspectors employed in the district, in the Taluks of Kolar, Chikballapur and Sidlaghatta were doing good work and that the man at Kolar was capable of an intelligent exposition of modern methods, while the one at Chikballapur, though not as clever in exposition, appears to have given useful instructions to raiyats and induced some of them to experiment with cutting of foreign mulberry

plants and hybrid cocoons. But these men are not able to produce any lasting impression on the raiyats, as the raiyats in outlying villages are chary of confiding in men whom they do not know and are averse to adopt improvements at the suggestion of such men. I agree therefore in Mr. Sparkes' opinion that these men may be attached to local schools. Better results may be expected if the Inspectors are generally confined to the taluk head-quarters, instructing the local raiyats in improved methods of growing mulberry and rearing silk-worms, instead of travelling through several villages As this work may not occupy them fully, they may be attached to the local Industrial Schools (if these are situated in mulberry-growing taluks) to teach Sericulture to the boys, and in other places they may be attached to the Anglo-Vernacular Schools, in both cases as regular members of the teaching staff; a small monthly allowance of Rs. 10 or Rs. 15 may be given to each of them from Local Funds, their pay proper being a charge on the schools in which they are employed. Their work as Sericultural Inspectors should be done under the guidance of the Amildars, through whom their diaries should pass. This arrangement will, I think, enhance the prestige of the Inspectors, get them more respectful hearing from the local raiyats, who will be readily disposed to have faith in their teachings, and attempt to follow in practice their suggestions, while being near at hand, the masters will be able to watch and guide the raiyats in carrying on the new experiments so that they may not go wrong and then consider the new methods as failures.

4. Now to proceed to the other suggestions of the District officers, I am of opinion that it will be very advantageous to the silk industry in Mysore, if Mr. Odzu can be got to visit the villages and explain to the villagers the improved methods and the use of modern implements. If, however, it is not possible at present to disturb Mr. Odzu from his charge of the farm, I think it very essential that some one of the officers working under Dr. Lehmann and having a knowledge of Chemistry and Agriculture should be directed to attend at the farm for learning all that Mr. Odzu might teach, so that he may, after training, travel in the interior and see what possibilities of improvement exist. As Mr. Odzu is the only officer well versed in Japanese methods and implements, it appears to me very necessary for the future of Tata's Farm itself and for the future of Sericulture in Mysore that some of our qualified men in the Agricultural Department should be associated with Mr Odzu. If, however, this is impossible, the Government may well send for another Japanese Sericulturist through Mr. Odzu for a period of three or five years, so that one of them may be in charge of the farm and the other may be available for inspection work in the districts

5. The idea of sending from taluks to Tata's Farm at Bangalore, raiyats interested or engaged in sericulture at Government cost has my full approval and I commend it strongly to the favorable consideration of Government. As an experimental measure a sum of Rs. 50 per year may be placed at the disposal of each of the four Deputy Commissioners for defraying the expenses of the raiyats, who may be taken in batches of four or more by the Inspector to the farm at Bangalore for about a week's stay.

6. As for the purchase and the distribution of Mukerjee's Hand-book, I think each district may get the copies required out of funds available for the purchase of books.

7. In conclusion, my proposals briefly are :—

(1) To revert the existing Sericultural Inspectors to Industrial or Anglo-Vernacular Schools in mulberry-growing tracts for duty as school-masters and grant them an extra allowance of ten or fifteen rupees for giving instructions either in or out of school hours in sericulture and improved methods of growing mulberry, etc.

(2) To sanction a grant of Rs 50 for each of the four districts for taking raiyats to the Bangalore Farm.

(3) To associate with Mr. Odzu, a Mysore officer working in the Agricultural Department or to send for another Japanese Sericulturist.

Letter No. 964, dated 15th June 1906, from the Deputy Commissioner, Mysore District, to the Revenue Commissioner in Mysore.

In forwarding herewith copy of letter No. 1124, dated 5—8th June 1906, from the Assistant Commissioner, French Rocks group of taluks, anent the working of the Sericultural Inspector of Mandya, I have the honor to state that I am of much the same opinion as the Assistant Commissioner, and have come to look upon the work of these Sericultural Inspectors as more or less of a farce, as they are unable to gain the confidence of the people or to really bring home any good to them. I think the money now being spent upon their pay might be better utilised in paying the railway fare of some intelligent raiyats going to Bangalore to see for themselves the Tata's Silk Farm.

Letter No. 1124, dated 5—8th June 1906, from the Assistant Commissioner, French Rocks, to the Deputy Commissioner, Mysore District.

I have the honor to report that Sericultural Inspector Narain Rao reported himself for duty in the Mandya Taluk on the 24th June 1905, in pursuance of the Revenue Commissioner's memo No. 8150, dated 26—28th April 1906 as communicated in your Order No. 3858—1205, dated 17th—22nd June 1905.

2. The Sericultural Inspector was for some months employed in visiting the villages in Mandya Taluk where silk-worms were being reared and mulberry was being grown, with a view to make the raiyats realize the benefits resulting from their adopting the system in vogue in Tata's Silk Farm in Bangalore, both in regard to the rearing of worms and in the cultivation of mulberry to feed them.

3. These visits of Sericultural Inspector were, for a considerable time, viewed with suspicion by the villagers, who gave ready evidence to the rumours started by mischief-mongers that the visits were intended for levying a tax on each mullberry bush.

4. The Amildar, during the Taluk jamabandi, and myself during the Huzur jamabandi were, to a certain extent, able to dispel this delusion from the minds of the villagers.

5. Besides the microscope, which was of practically no use to the Sericultural Inspector, he had not been equipped with any of those necessary and useful contrivances used in the rearing of silk-worms in Tata's Farm in Bangalore.

6. While on short casual leave in Bangalore, I had the privilege of being shown over Tata's Silk Farm by Mr. Odzu, the Superintendent. From what I was able to learn from him, I am of opinion that the lines on which the present Sericultural Inspector is made to work will be practically of no avail. It seems to me best to invite Mr. Odzu to visit some of the silk-rearing centres in this taluk and to point out to the Amildar and the villagers concerned where they err and how best the mistake could be remedied. Another plan would be to take a couple of intelligent silk-worm rearers to Tata's Farm in Bangalore and to show them the superior hybrid cocoons and how much more silk thread could be spun out of this class of cocoons than from those of the indigenous kind. Such an object lesson is not likely to be thrown away, and I am sure that the silk-worm rearers would return with a supply of hybrid worms. In this way the quality of the silk turned out may considerably be improved. It is likely that the raiyats would not be slow to grasp the usefulness of nets and disinfectants used in connection with the rearing of worms in Tata's Farm. As a sort of incentive to first visitors I would recommend that their trainage and other expenses may be defrayed by Government. The Amildar will accompany them to instil confidence in them in the new undertaking, I would, therefore, solicit an advance of Rs. 50 being sanctioned for this purpose.

7. I see no use in keeping on the Sericultural Inspector, and would therefore respectfully venture to submit that he may be reverted to his substantive appointment as school master in the Kankanhalli Taluk.

Letter No. 1868--82, dated 29th July--8th August 1906, from the Deputy Commissioner, Kolar District, to the Revenue Commissioner in Mysore.

With reference to your docket No. 11724, dated the 27th June 1906, I have the honor to submit the following report on the work done by the Sericultural Inspectors in this district.

2. The three Inspectors posted to this district, as per your official memorandum No. 8148, dated 28th April 1905, entered upon their duties on the dates noted in the margin. There being no mulberry cultivation in the Goribidnur Taluk, the Inspector appointed to that taluk was directed to work in the Kolar and Chintamani Taluks, where the silk industry thrives on a somewhat large scale. They were placed under the direct supervision of the Assistant Commissioners in charge of the respective taluks.

Sidlaghatta Inspector, 11th May 1905.
Kolar Inspector, 6th May 1905.
Chikballapur Inspector, 17th May 1905.

3. The number of villages visited by these Inspectors during the period under report is given below :—

Chikballapur Inspector	...	...	...	142 villages.
Kolar Inspector	...	...	...	136 do
Sidlaghatta Inspector	...	...	...	90 do

4. They also visited some of the important villages, more than once, to see how far the raiyats have profited by the instructions given to them, as they were found unable to grasp them by one lecture.

5. During their travel from village to village, the Inspectors have been, with the aid of the patels and shanbhogs, mustering the villagers engaged in silk-worm industry, and giving them general instructions on improved methods of sericulture, nature and causes of common diseases peculiar to silk-worms, eggs and mulberry plants, and the remedial or preventive measures therefor, the importance of light ventilation, accommodation, disinfecting and so forth. They have also been demonstrating to the raiyats on the spot, with the aid of microscopes, the specific germs of the different kinds of diseases, which generally attack moths and eggs.

6. The villagers concerned, I learnt during my late tour, seemed to have appreciated and followed the suggestions regarding sanitation, light, accommodation and disinfection, which were found to be less costly and more easy of adoption than the other details. As a result

of the instructions given by these Inspectors, some raiyats from the Kolar, Chintamani, Sidlaghatta and Chikballpur Taluks went of their own accord to Mr. Tata's Farm at Bangalore and brought some seed cocoons and reaped two or three harvests of silk, which proved to be twice as much as, and far superior, in colour, to what is got by the ordinary method.

7. The Chikballapur Inspector introduced the cross-breed cocoons in the villages of his taluk, and a fine specimen of silk was produced thereform by one Mr. Yernool Narasimhia of Chikballapur, weighing three tolas.

8. The improved methods of cultivation of mulberry, advocated by these Inspectors, find favor with the raiyats, on account of the better results achieved in certain cases; and it is reported that the raiyats of as many as 65 villages of the Chikballpur Taluk, had applied for Japanese Sericulture implements, but that they could not be supplied to them, not being available at the farm at Bangalore.

9. It is thus evident that the improved methods suggested by the Inspectors and their advantages are being realized by the people and there is no doubt, in course of time, good results may be expected. The Inspectors were not supplied with the necessary sericultural implements till the 15th of May last. Had they been supplied earlier, they would have been better able to demonstrate the simplicity, neatness, utility and other manifold advantages of the system, which, it is hoped, they will be able to do in future by concentrating their energies, if possible, on one or two model farms in the district, which I expect to be in a position to induce a few leading silk-rearers to open in eligible localities under suitable environments.

10. The Assistant Commissioner in charge of the Kolar group of taluks states that the Kolar Sericultural Inspector has applied to him for printing a large number of copies of a memo of instructions, as the raiyats often forget the instructions conveyed in one lecture, and would appreciate a book of reference on the subject. Though most of the raiyats are illiterate, the shanbhogs and literate patels can act as expounders of the pamphlet, and he thinks, and I agree with him, that the Inspector's application deserves consideration. Copies of Mukerjee's Hand-book of Sericulture may also be caused to be supplied to all Assistant Commissioners engaged in the supervision of the industry.

Letter No. R. C. 218, dated 10th September 1906, from the Deputy Commissioner, Bangalore District, to the Revenue Commissioner in Mysore.

When at Channapatna, a short time ago, I had a conversation with the principal silk merchants of the town with a view to ascertain whether the Sericulture Inspectors were doing any good in the district by their present method, and all the merchants were unanimous in stating that they did not consider it of much use, nor was it likely to be, as the raiyats generally were too conservative in their methods to alter and also too poor to introduce any extra expenditure. What the merchants informed me was really required is good seed from healthy moths. On thinking the matter over, it struck me that these Sericulture Inspectors could be much better employed, if one or two of them were attached to the Industrial School at Channapatna, where they could be under supervision and teach the boys the rearing of these worms on the improved methods, and at the same time raise seed from healthy moths and which could be sold to help to defray expenses. Channapatna being a centre of sericulture, I am sure many raiyats would visit the institution and pick up new ideas and introduce them gradually into their own homes, if a practical demonstration is given them; from my experience of the raiyats, I am sure that this alone will help them and will do far more good than any amount of preaching. I mentioned this proposal to Mr. Subbasawmy Iyer, Superintendent of the Mysore Industrial School, and he agreed with me that the idea was good and that what is mostly required in these Industrial Schools is the development of the local industries, at any rate to begin with. This fact is well demonstrated at the Dodballapur Industrial School, where the weavers are sending their small sons to the school to learn the use of the fly-shuttle and in some instances have began to introduce the new looms into their own homes. Should you fall in with my idea, I would request you to move Government in the matter of locating these Sericulture Inspectors in the Industrial Schools, or to start small ones on their own account in some of the sericulture centres.

Letter No. 222, dated 8th October 1906, from the Deputy Commissioner, Tumkur District, to the Revenue Commissioner in Mysore.

With reference to the Revenue Commissioner's docket No. 11725, dated 27th June 1906, calling for a report on the work done by the Sericultural Inspector of the Kunigal Taluk during the year 1905-06, I have the honor to state as follows:—

The Sericultural Inspector visited during 1905-06, Kunigal, Hutridurga, Hulyurdurga and Amritur hoblis, more frequently than the remaining two hoblis of Yediyur and Kottigere. As per instructions, set forth in paras 6 to 12 of the rules for the guidance of the Sericultural Inspectors, instruction upon the rearing of the silk-worms was imparted to the people. The nature and causes of the common diseases of silk-worms and the importance of light, ventilation to them and the need for cleanliness were also explained. The rearers of silk-worms in

the whole taluk may therefore be said to have derived much useful hints upon the spreading of young worms on trays, the mode of feeding them especially in the cold season, the storing of the mulberry leaves, the removal of litters and the selection of good seed to get good crop, etc. The Sericultural Inspector has lost no opportunity to impress upon the rearers the importance of disinfecting the rearing house, baskets, etc., before commencing each rearing.

Some hybrid cocoons and sericultural implements such as nets, sieves, etc , that were supplied to the Inspector have been shown to the rearers, and the superiority of the hybrid cocoons was also demonstrated to the people. The employment of the Sericultural Inspector has no doubt been perceptibly beneficial to the silk-worm rearers in that the instruction given has enabled them to use mulberry leaves with more economy and has taught them to use the litter as manure.

With regard to the better quality of silk produced under the scientific instructions now imparted to the raiyats and the enhanced value of the silk realised in the market, it is not possible, at present, to assert with any degree of certainty considering the short period of only one year during which the special agency has been at work. It requires more time for the raiyats to become impressed with the advantages and to provide themselves with the required machinery, so that the remaining term of one year must terminate before I might be able to adequately estimate the usefulness or otherwise of the Sericultural Inspector in the taluk.

A statement of expenditure incurred on account of the salary of the Sericultural Inspector during the year 1905-06, is also appended.

Letter No. 229, dated 22nd—23rd October 1906, from the Deputy Commissioner, Mysore District, to the Revenue Commissioner in Mysore.

With reference to your docket No. 3208, dated 15th—22nd September 1906, *re* the work done by the Sericultural Inspector, I have the honor to state that I have not yet been able to judge for myself the work done by these Inspectors, as it is only three months since I took charge of the district. As the jamabandi of the Mandya Taluk will be conducted by me, a separate reference will be made on the subject after finishing the jamabandi of the said taluk, whereto a Sericultural Inspector is attached.

No. 8927-40—Ed. 201-06-2, dated Bangalore, 27th March 1907.

Order thereon.—Government agree with the Revenue Commissioner that the school masters should revert to their legitimate work and should confine their teaching to silk-worm rearers in the locality in which their school work lies, an allowance of Rs. 10 each per mensem being paid to them for this extra work. An inexpensive building should be provided where such instruction may be imparted out of the regular school hours. The time and duration will be regulated for each locality by the Inspector-General of Education in consultation with the Deputy Commissioner. A statement showing the number of students undergoing instruction in sericulture and the progress made by the students should be submitted every month direct to the Deputy Commissioner of the district and by him to the Revenue Commissioner. Any default on the part of the school masters in working up to the standard laid down by the Deputy Commissioner will entail the withdrawal of the allowance under the orders of the Revenue Commissioner. The Inspector at Kolar will, as suggested by the Inspector-General of Education, who was consulted in the matter, continue to be employed on his present work.

2. Government also agree with the Revenue Commissioner, that one of the Assistants to the Agricultural Chemist should be sent to the silk farm at Bangalore to study the various methods with a view to bringing them to the notice of the silk-worm rearers in the important centres of silk industry in the districts of Kolar, Mysore, Bangalore and Tumkur. The Agricultural Chemist will make the necessary arrangements in the matter.

3. Government consider that a better way of utilizing the Tata's Silk Farm to the best advantage would be to get young men engaged in the silk industry in the different districts to go through a regular course under the guidance of the Japanese expert in charge of the farm, so that on return to their villages they may be the means of introducing improved methods in the different centres of the silk industry. A period not exceeding three months may be prescribed for acquiring the necessary training but if the young men are certified to have learnt all that is required within

a shorter period they may be dismissed on obtaining such a certificate. The curricula may be laid down by the Revenue Commissioner in consultation with the officer in charge of the silk farm.

4. The Inspector-General is requested to make arrangements in consultation with the Chief Engineer to provide buildings for the resident students, and this is best done by adopting a system of detached blocks to suit the requirements of the different classes of the community. A small sitting room for the student and a common cooking, eating and bathing room for each block ought to suffice. A small rent might also be charged to such of the students as are able to pay, others being lodged and fed at the cost of the State or the students themselves allowed to make their own arrangements for food, the State paying a scholarship to such of them as are unable to support themselves. The Inspector-General is requested to submit definite proposals to be given effect to when the system of training has been regularly introduced. The selection of the site and other arrangements will be made in consultation with the Chief Engineer after Mr. Odza's return to Bangalore.

5. The Revenue Commissioner is requested to arrange for Mr. Mukerjee's notes being translated in full both in Canarese and Hindustani in the form of leaflets and distributed largely among the silk-rearers in the different centres in the Tumkur, Kolar, Mysore and Bangalore Districts.

6. The instruments and appliances referred to in Mr. Mukerjee's notes may be supplied for the use of the demonstration farm (Tata's) at Bangalore, and may also be made available for sale to such of the silk-worm rearers out in the districts as may wish to purchase them.

7. It is desirable to run up a large shed either with a Mangalore tile roofing or with corrugated zinc roof, in which the different processes could be demonstrated to the students. The building should be erected in the centre of the four blocks referred to in para 3, the blocks being conveniently located at the four corners of the building, a space of about 50 feet being left all round the building. The Inspector-General is requested to take needful steps in the matter in consultation with the Chief Engineer.

8. It is not clear if the demonstration of the Bengal system of reeling is still going on in Bangalore. If it was exhibited only for a time, the Inspector-General is requested to report whether the services of a reeler from Bengal may not with advantage, be engaged for a period of six months when the buildings are completed and the new scheme started, to demonstrate the method to the students in the Tata's Farm.

9. In the light of Mr. Mukerjee's remarks, the elaborate training provided in the curriculum sent up by the Manager of the Tata's Farm may not be quite necessary for young men actually engaged in silk industry, though the same may be adopted for imparting instruction to the Assistant to the Agricultural Chemist and to such of the students as may desire it and possess the requisite educational qualifications to enable them to benefit by such instruction. It is, however, noted that the curriculum referred to was intended to meet the cases of Sericultural Inspectors, but the present scheme proceeds upon a different principle altogether and provides for the instruction of men engaged in the industry.

READ—

1. Report on Public Instruction in Mysore for 1905-1906, submitted by the Officiating Inspector-General of Education in Mysore with his letter No. 3108-261, dated the 30th October 1906.

2. Also Report on the working of the Central College for the same year.

No. 9008-18—ED. 52-06-8, DATED BANGALORE, 28TH MARCH 1907.

ORDER THEREON.—The number of institutions both public and private increased from 3,828 to 4,093 and their strength from 111,045 to 123,057 scholars, of whom 103,392 were males and 19,665 females. The percentages of boys and girls to the male and female population of school-going age increased from 22·68 and 4·31, respectively, to 25·04 and 4·86. The percentage of pupils of both sexes to the total population of school-going age was 15·05 against 13·58 in 1904-05. It is thus satisfactory to note that plague had no appreciable effect on education during the year 1905-06.

It will be interesting to compare the percentages of pupils of each caste or creed to the total population of school-going age in such caste or creed with those of the previous year. The proportions are given below under five main headings:—

No.	Caste or creed	No. of pupils		No. of School-going population at 15 percent of the total population (Census of 1901)	Percentage of figures in Column II to those in Column III	
		1904-05	1905-06		1904-05	1905-06
1	Hindus	92,109	102,419	7,57,267	12	14
2	Mahomedans.	13,937	15,272	40,220	35	38
3	Native Christians	2,195	2,325	4,304	51	54
4	Europeans and Eurasians ...	375	552	636	59	87
5	Others including Parsis ..	2,429	2,489	15,043	16	17
	Total ...	111,045	123,057	817,470	14	15

These figures show general improvement all round.

2. The aggregate expenditure on education during the year 1905-06 amounted to Rs. 13,74,931 against Rs. 12,84,484 in 1904-05 and was met from the following sources:—

No.	Headings	Amount Rs	Percentage
1.	State Funds	7,44,802	54
2.	Local Funds	2,67,969	20
3.	Municipal Funds	30,792	2
4.	Fees	1,46,868	11
5.	All other sources	1,84,500	13
	Total. ...	13,74,931	100

Taking the State Revenue at 195 lakhs the expenditure of nearly 7½ lakhs from State Funds shown in the above statement works out to be about 3·8 per cent.

3. At the close of the year Mr. Bhabha, the Inspector-General of Education, was granted seven months' leave (inclusive of four months' furlough) and Mr. J. Weir was appointed to act for him during his absence.

The scheme sanctioned in July 1905 for the revision and strengthening of the Inspectorate is fully described in Chapters I and II of the Report. The main feature of the scheme is (1) the division of the State into two circles for purposes of inspection, each circle being placed under an Inspector who is expected to supervise the work of the Deputy and Assistant Deputy Inspectors and (2) the appointment of eight additional Assistant Deputy Inspectors. As thus revised, the Inspecting staff consists of two Circle Inspectors, nine Deputy Inspectors and thirteen Assistant Deputy Inspectors, besides the Inspector-General of Education.

In para 22 of the report, the Inspector-General states that some of the Inspecting officers spent a larger number of days at head-quarters than is desirable and that nevertheless comparatively few schools remained uninspected during the year. This naturally leads to the conclusion that either these officers did not inspect the schools within their charge as often as they could otherwise have done or that their inspection was cursory, in either case indicating the need for improvement. From Appendix B_{12}, it appears that Messrs. C. Krishna Rao and M. Srinivasa Rao, Circle Inspectors, inspected 86 and 74 schools, respectively, while the number of days spent by them in examining schools was only 36 and 38. Such hurried inspections, while probably entailing excessive expenditure to the State under travelling allowances, cannot produce much benefit as far as the schools themselves are concerned. The Inspector-General is requested to arrange that inspections are more efficiently conducted in the future and to explain in future reports how many schools were found inefficient at the time of inspection and what steps were taken to improve their efficiency.

The function of Inspectors is of considerable importance in the Education Department. The sifting of results devolves on them. An Inspector's duty in the case of Aided Schools is to verify the conditions on which public aid is given to them from year to year. In the case of all schools in his jurisdiction he is called upon to visit from day to day schools of different types, to observe carefully the merits and demerits of each, to place himself in sympathy with teachers and their difficulties, oftentimes to convey to each of them kindly suggestions as to methods of discipline and instruction he has observed elsewhere, and to leave behind him at every school he inspects some stimulus to improvement, some useful counsel to managers and masters, some encouragement to teachers and children to do their best. There are few posts in the public service which offer larger scope for the beneficial exercise of intellectual and moral power on a large number of people. At para 24 of his report the Inspector-General of Education has laid stress upon the visits to schools paid by officers of the Revenue Department. But to many schools in the comparatively remote and apathetic tracts the visits of an Inspector conversant with and experienced in educational work and charged with the duty of ascertaining how far the ideal formed at head-quarters has been fulfilled, is an event of no small importance. It is not intended that Inspectors should be pedants and detectives who confine themselves to the routine of examination. They should rather be men prompted by insight and enthusiasm and breadth of sympathy, judging justly both of the work of a school and of the spirit in which the work is done and advising local authorities in its management recognizing the real meaning and value of the humblest detail.

4. Collegiate education which is imparted in the two First Grade Colleges of the State at Bangalore and Mysore, was fairly satisfactory. The number of pupils on the rolls of these two colleges and the Maharani's College at Mysore was 370 against 378 in 1904-05. The results of the B. A. Degree Examination of 1905 were very fair except in the Mathematics Branch, in which only 3 out of 8 from the Central College and 2 out of 9 from the Maharaja's College passed. It is necessary that steps should be taken to improve the teaching of this subject.

The F. A. results were also fair but only one student passed in the first class.

The Maharani's College at Mysore, which is an institution for girls, sent up three private candidates for the B. A. Degree Examination in History, 2 of whom passed, one in the second class and the other in the third class. It is gratifying to note that these two Brahmin lady teachers of this College took their degree in 1906, being probably the first instance in which orthodox Brahmin women have achieved such a distinction. The total amount spent on the three Colleges during the year was Rs. 1,18,924.

5. The number of secondary schools in the State increased from 272 to 288, of which 15 were High Schools and 273 Middle Schools. The number of pupils in the High and Middle stages was 1,839 and 10,569 respectively. In 7 out of the 14 High Schools for boys the results of the Matriculation Examination of 1905 were not satisfactory, the passes in them falling far short of the average for the whole University, *viz.*, 24·4. They are named in the margin. The Inspector-

6.	Wesleyan Mission	do	do	Mysore 11.
7.	Marimallappa's	do	do	do 5.

General of Education is requested to take the necessary steps for improving the efficiency of these schools, which appear to have shown unsatisfactory results in the previous year also.

6. The number of public Primary Schools decreased from 1,913 to 1,910 chiefly by the conversion of 10 of these schools into Middle Schools; on the other hand, the number of private indigenous schools, which are mostly elementary, increased from 1,572 to 1,822. The total number of pupils of both sexs in the primary stage of instruction was 107,214, which is a little more than 10 per cent of the total population of school-going age. It is also stated that the village school committees took keen interest in the management of these schools. These facts show that primary education is increasing in popularity. There is, however, need for encouragement and considerable scope for improvement as remarked by the Inspector-General at para 57 of his report, and Government will be prepared to receive the Inspector-General's proposals in this behalf. (*Vide* Government Order No. 840-9—Ed. 156-04, dated the 20th July 1905.)

7. The attention of Revenue officers will be invited to para 24 of the report, in which it is stated that visits to village schools by Revenue and other officers decreased during the year. The Deputy Commissioners and Amildars of the Chitaldrug District and the Amildars of the Tumkur District, however, are stated to have taken much interest in the spread of Primary Education and Government note with satisfaction their work in this direction.

8. Female Education continues to be popular. The number of girls' schools increased from 246 to 251 and the total number of girls under instruction rose from 17,446 to 19,665. The Maharani's College at Mysore, which is the central institution for girls in the State, showed good progress under the guidance of the Lady Superintendent and the strong Managing Committee. Besides the two Brahmin ladies already referred to as having taken their B. A. Degree, 10 girls passed the English Lower Secondary Examination, 32 girls passed the Vernacular Lower Secondary Examination and 12 the Teachers' Certificate Examinations of the Lower Secondary and Primary grades. These results are satisfactory. The chief difficulty in the way of female education is the want of passed or trained female teachers, but this is a want that, under the circumstances, can only be gradually supplied. The expenditure on female education was Rs. 1,94,011 against Rs. 1,81,142 in 1904-05.

9. The three normal schools at Mysore, Kolar and Shimoga worked satisfactorily and altogether 54 candidates passed the Teachers' Certificate Examinations of the various grades. The number of untrained and unpassed teachers appears to have decreased from 874 to 776. This is a valuable improvement, of which more is desirable.

10. The number of Industrial Schools decreased from 18 to 17, the Private Industrial School at Talkad having ceased to exist, for what reasons the Inspector-General has not explained. The number on the rolls, however, increased from 741 to 857 and the Mysore Industrial School showed progress in all its departments. The details of the work in this and other schools are fully given in Chapter VI. It is observed that the scheme sanctioned in April 1903 for the improvement of Industrial Education in the State has not been fully carried out. The Industrial Schools proposed to be opened at Chikmagalur, Sagar and Shimoga, for which provision is being made in the annual budgets of successive years from 1903-04 have not yet been started. Probably such schools are not practicable at these places. In that case it is desirable to drop the budget provision in future budgets and make the funds available for more pressing requirements elsewhere.

The other special schools were—

(1) the Engineering School at Mysore in which pupils are trained for the subordinate service of the Public Works Department,

(2) the school at Mysore for the deaf mutes and the blind, and

(3) the two Commercial Schools at Mysore and Bangalore.

The working of these schools is fully described in paras 80, 81 and 82 of the Inspector-General's report. The State grant for the schools for the deaf mutes and the blind has since been raised from Rs. 75 to Rs. 125 per mensem.

11. There were four Oriental Colleges (the same as in the previous year) three of which impart instruction in Sanskrit and one in Kannada. The number of Sanskrit Schools increased from 38 to 40 and the total number of students learning Sanskrit in all schools was 3,489. The results of the Vidvat and Pupils' Examinations in Sanskrit were fair.

12. It is satisfactory to note that Mahomedan Education is steadily progressing. The number of Mahomedan pupils increased from 13,937 to 15,272 and the passes of Mahomedan boys in the various public examinations are satisfactory. In addition to the two Deputy and Assistant Inspectors already on the staff, one Deputy Inspector was appointed during the year for the inspection of Hindustani Schools. The Inspector-General reports (para 104) that several of the Hindustani teachers are being trained in the Normal Schools, and that the unpassed teachers are being compelled to pass an examination. This is good.

13. The number of pupils of the depressed castes under instruction during the year was 2,729 (2,395 boys and 334 girls) or 232 more than in 1904-05. With a view to help the spread of education among the backward classes, the Government have ordered the permanent exemption of pupils of certain depressed castes from payment of fees in the taluk and subordinate schools.

SECTION 3—MISCELLANEOUS

Proceedings of the Government of His Highness the Maharaja of Mysore.

No. G. 5796-836—G. M. 181-06-55, DATED BANGALORE, 23RD MARCH 1907.

ORDER.—The following instructions for the preparation of the annual return of Europeans and Eurasians, received from the Residency, are communicated to the Heads of Departments, Deputy Commissioners of Districts and other officers concerned, for their information and guidance:—

(1) In future the return will be prepared in the form appended.

(2) The names of British officers lent for employment in the State under the rules contained in Chapter XL of the Civil Service Regulations are now included in this annual return of Europeans and Eurasians. In view of the fact that the names of all lent officers are entered in the annual foreign service return prescribed in Government Order No. 11896-934—Mis. 2581, dated the 21st April 1899, the future returns of Europeans and Eurasians will only show particulars regarding Europeans and Eurasians who, being British pensioners or not being officials of the British Government, are employed in the Mysore State.

MUZRAI

Proceedings of the Government of His Highness the Maharaja of Mysore.

No. 4255-63, DATED BANGALORE, 4TH MARCH 1907.

ORDER.—It has been brought to the notice of Government that many of the persons who borrowed Puduvat amounts from temples have not paid the interest due thereon or repaid the principal. The Deputy Commissioners of Districts are requested to get statements from the Amildars showing what amounts are due from each individual, up to what period the interest has been paid and whether any of the documents are time-barred.

2. In the case of the documents which are not yet time-barred but on which interest is not being regularly paid by the parties concerned, the Amildars should issue notices of demand, allowing the parties a reasonable time for payment and collect the interest or get back the principal, according to the circumstances of each case.

3. Cases in which the parties fail to pay even after the expiry of the time allowed, should be reported to Government for permission to file suits in the Civil Court against the parties concerned, stating at the same time the source from which the costs of the suit can be met.

4. If any of the documents are time-barred, the Amildars should use their best endeavours to collect the amounts due, by reasoning with the parties concerned.

5. The Amildars will be warned that they will be held personally responsible for amounts allowed by them to become barred. In this connection attention of the Deputy Commissioners is invited to Subject No. 310 brought up at the Dasara Representative Assembly of 1906, by the members Messrs. Dasappa and Chowdaiya of the Arsikere Taluk, and the reply of Government thereon and they are requested to issue the needful orders in the matter at an early date.

6. The results of the investigation made by the Deputy Commissioners should be reported to Government in detail before the end of May 1907.

7. Instances are also brought to notice that the amounts of interest realized on some of the Puduvat Funds invested in the Government Savings Bank or in Government Pro-notes, are not regularly drawn by the Amildars and remitted to the respective temples for utilization towards the stipulated sevas, etc., therein. The Deputy Commissioners should give the necessary instructions to the Amildars on this point also.

Correspondence ending with letter No. 561—94, dated 29th November 1906, from the Deputy Commissioner, Shimoga District, recommending that the chattram and temple built by Mr Kaule Dyavappa at Sagar and the endowments attached thereto may be taken under Government management.

No. 4354-5, DATED BANGALORE, 6TH MARCH 1907.

ORDER THEREON.—The Deputy Commissioner reports that Mr. Kaule Dyavappa, a rich land-holder residing at Sagar, has built a temple dedicated to Dattatreya Devaru and a chattram attached to it at a cost of Rs. 22,000, that the construction of the chattram for the accommodation of all classes of travellers has supplied a long-felt want and that Mr. Dyavappa, in view to place the institutions on a satisfactory footing has deposited in the Government Savings Bank Rs. 10,000 and has

also endowed them with some lands. Out of the sum of Rs. 10,000 referred to above a sum of Rs. 6,000 has been invested in the new Mysore Government 4 per cent loan. The Deputy Commissioner recommends that the charities might be taken under Government management in accordance with the wishes of the donor, that a scale of expenditure be fixed thereto and that Mr. Dyavappa might be appointed sole Dharmadarsi of the charities during his life time and after him any competent member of his family.

2. The estimated annual income from the endowments to the temple and chattram is Rs. 602-0-0 as per details shown in the accompanying Statement A and the proposed annual expenditure is Rs. 431 as shown in the Statement B.

3. Under the foregoing circumstances, the Government are pleased to sanction the Deputy Commissioner's recommendation to take over under Government management the temple and chattram and the cash and land endowments attached thereto. The proposed scale of expenditure as shown in the Statement B is approved. Mr. Dyavappa may be appointed sole Dharmadarsi and Manager during his life time and after him, some competent member of the family may be included in the management. A notification will issue separately. The Manager will have to keep regular accounts and make them available for inspection by Government Officers and also act up to the suggestions and orders of the Amildar.

4. The sum of Rs. 4,000 now in the Savings Bank may be converted into 4 per cent loan paper when a convenient opportunity occurs.

2. The records of enquiry show that Survey No. 30, out of the four numbers detailed in para 1, has been in the enjoyment of the Jodidar himself (the Matt) and that the remaining three numbers have been alienated. The circumstances of the alienations are described below.

3. Nanja Waderu of the Hunsamaranahalli Matt leased out the lands to one Doddamane Papanna on the 5th June 1871 for an annual gutta of 16 varahas and on the condition of the latter giving him half the produce of the tamarind tree standing on the lands. The saguvali chit, as it is called, which is an unregistered one, did not make any mention of the period for which the lands had been leased out. The lessee and his son Papanna appear to have paid the lease amount to the Matt regularly along with others till the year 1901, but they had in the meanwhile given out for cultivation to others some portion of the lands and alienated the others, reserving for themselves a portion of it. The lands passed into several hands through sale, mortgage, etc., and the present holders are eight in number as noted in the margin, including the son of the original lessee. The 1st holder admits his and the other holders' responsibility for the payment of Rs. 84-4-0 to the Matt on the entire lands, as agreed upon by them in 1902, and acknowledges the fact of his having alienated some portions of the lands to Chikka Veeranna and Madhure Channa Basappa. He also states that some other portions were mortgaged by his uncle Lakshmanna to Veerasettappa, Giddannanavara Chikkanna and Rudramuniyappa.

1. Doddamane Papanna.
2. Buddimane Papanna.
3. Yeletotada Rama.
4. Giddannanavara Chikkanna.
5. Rudramuniyappa.
6. Aswathakallu Basanna.
7. Chikka Veeranna, son of Veerasettappa.
8. Muguvalappa, son of Veeranna.

4. The 2nd and the 3rd holders state that they are only sub-tenants of the 1st holder and that they have not alienated their portions to any one.

5. The 4th holder in his 1st statement before the Amildar Mr. Ranga Rao on the 25th August 1901 owned the fact that the portion enjoyed by him belonged to the Hunsamaranahalli Matt, but in his 2nd statement before the Taluk Sheristadar, on the 8th May 1905, he pleads his ignorance of the ownership of the Matt, and he argues that it was sold to his brother-in-law in 1887 by one Basavanna Chikkannappa, alleging that it was his kandayam land and that it was again sold to him about 17 years ago. He however says that he was paying annually Rs. 2 on the land to the representative of the Matt and that the amount was since raised to Rs. 3.

6. The 5th holder Rudramuniyappa represents that the portion, which is now in his enjoyment, was sold to him in 1898 by one Maligappa, who alleged that it was his kandayam land.

7. The 6th holder Aswathakallu Basanna states that the portion of the land in his enjoyment came to the possession of his grandfather Basanna under a mortgage deed executed in his favor by one Basanna in the year Pramoduta and that a sum of Rs. 2 per annum is since then being paid on the land to the Hunsamaranahalli Matt.

8. The 7th holder Chikka Veeranna states that the portion of the land in question came to the possession of his ancestors many years ago through alienations and that he has been paying kandayam thereon to the agent of the Hunsamaranahalli Matt. He further states that as he has spent a large amount on the improvement of the land, he cannot resign it in favor of the Matt.

9. The 8th holder Muguvalappa is reported to have not appeared before the Amildar although notices were duly issued to him.

10. Under the circumstances detailed above, the Amildars, Messrs. M. Ranga Rao (now Excise Assistant Commissioner) and Dharmaraj Chetty and the Deputy Commissioner, Mr. Devaraj Urs, are of opinion that as the alienations have taken place subsequent to 1853, the case falls under clause B of the alienation Rules of 1877 and that the lands have therefore to be resumed and restored to the Matt.

11. The fact that the land in question is a Devadaya Inam land granted for the maintenance of the Matt is unquestionable as is evidenced by the copy of the Inam Register received from the Inam Superintendent. That it belongs to the Hunsamaranahalli Matt is admitted by the alienees themselves, as they say that they have been paying the kandayam on their portions to the representative of the Matt. The original lessee, Dodda Papanna's son Papanna, unreservedly confesses

that he and his father alienated some portions of the lands for want of funds. All that the alienees represent is that the portions of the Devadaya Inam lands in question came to the possession of their ancestors by means of sale or mortgage and bring forward their long enjoyment as the chief reason for not giving them up in favor of the Matt. A few of the alienees have also put forth the plea that Channabasava Wadeyar, the agent of the Hunsamaranahalli Matt, had agreed to receive from them kayamgutta on the land.

12. The Government are of opinion that neither the agent nor the priest of the Matt is authorized to permanently lease out Devadaya Inam lands to the prejudice of the Matt's interests. Even long leases, not to speak of permanent leases, are considered to be practically temporary alienations and were not accepted by Government in some instances (*vide* para 3 of Government Proceedings No. 2413-23—Muz. F. 57-92, dated the 30th May 1903). The original lessee of the Matt, Dodda Papanna, had no authority to alienate the land in question.

13. In these circumstances the Government of His Highness the Maharaja are pleased to direct the cancellation of the alienations in pursuance of Government Notification No. 266, dated the 17th November 1877. The Deputy Commissioner is requested to take action as per clause B of Rule II of said notification and report to Government in due course the fact of the lands having been resumed and restored to the Matt.

14. The priest of the Matt should be informed that the action of his agent Channabasava Wadeyar in having permanently leased out the lands as alleged by some of the alienees was unauthorized and that a repetition of the same either by him or by his agent would entail the resumption of the Matt's land to Government.

15. The alienees should be informed by means of Endorsements that it was the fault of their ancestors or of themselves to have accepted the alienations of the Devadaya Inam lands, which are inalienable.

READ—

Correspondence ending with letter No. 685—109, dated 23rd January 1907, from the Deputy Commissioner, Shimoga District, reporting on the affairs of the temples at Hunchadakatte in the Tirthahalli Taluk.

No. 4423-5, DATED BANGALORE, 8TH MARCH 1907.

ORDER THEREON.—From the correspondence read above, it is observed that the temples of Bhavani Sankaradevaru, Parvati Devi and Ganapati Devaru at Hunchadakatte in the Tirthahalli Taluk and the temple of Narayana Devaru in the Nagar Taluk, are all of them together endowed with Inam lands measuring 224 acres and 9 guntas and assessed at Rs. 664-4-0.

2. The Deputy Commissioner reports that the temples and their lands are at present under the management of one Hunchadakatte Appanniah, Vahivatdar of the said institutions, that he is not on good terms with the pujari and the tenants of the lands, that the pujari has not been given his pay for the past four years and that no amount has been given for Paditara, etc., in the temples. The villagers are also stated to support the above allegations and to complain that no special Utsavams, etc., are being carried out and that the temples are in need of repairs. It is further reported that if all the temple lands are given out for cultivation, and properly managed, they would yield an annual income of about Rs. 1,000, but that owing to the remissness on the part of the Vahivatdar, most of the temple wet lands are lying banjar and the arecanut gardens are in a neglected condition.

3. From the records submitted it is also observed that the mismanagement of the institutions and their affairs having been brought to the notice of Mr. C. S. Balasundaram Iyer when he was in charge of the Sagar Sub-Division, he recommended the removal of the said Vahivatdar so long ago as 1903 and the Deputy Commissioner Mr. K. P. Puttanna Chetty (the present 2nd Councillor) approved of the recommendation and issued orders accordingly on the 20th July 1903, but that order was not carried into effect, the matter being kept on under further correspondence.

4. It is now reported that no records are to be found either in the District or in the Taluk Office to show how and when the said Appanniah was appointed Vahivatdar, and that though he was served with several notices he failed to produce any authority for his managing the temples in question. The Deputy Commissioner further states that he personally inspected the institutions and that he is satisfied that the Vahivatdar has not been paying any attention to the due performance of services in the temples.

5. Under the circumstances above set forth, the Government direct that Vahivatdar Appanniah be removed at once, and the temples and their lands, etc., be brought under the management of Government in the Muzrai Department on account of mismanagement. The Deputy Commissioner is requested to report the exact income from the temple lands and also submit a scale of expenditure in the temples for the sanction of Government.

6. The Government further observe that the Vahivatdars of a great many temples in the malnad deal with temple Inam lands as if they were their own personal property, and totally neglect the institutions concerned, as was being done in the present case. The attention of the Deputy Commissioners of the Shimoga and the Kadur Districts is invited to this Office Nos. 4096 and 4097, dated 20th March 1906, and they are requested to expedite the submission of the proposals therein called for.
